SFEDS, PLANTS, BULBS

CHLEGEL & FOTTLER CO.

26 & 27 S. MARKET ST. BOSTON, MASS.

1907

UR NEW SALESROOM on the street floor has proved to be a decided attraction and our business has been largely increased since we leased the entire building 26 and 27 South Market street. This would indicate that our efforts to please our customers have been appreciated. No more critical or exacting class of trade can be found than that of the market-gardeners and florists around Boston, and to them annually we have sold large quantities of seed for many years. Seeds that satisfy these branches of trade are certainly safe for the general public to use.

The larger portion of our seeds are grown for us on contract by special growers, from our own stocks, and in locations best suited for their development. Others are secured from strictly reliable sources, and constant effort is made to secure only the best.

We, however, give no warranty, express or implied, as to quality, description, productiveness, or any other matter of any Seeds, Bulbs or Plants we send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they must be at once returned.

We do not send out seeds to be sold on commission. Much disappointment can be avoided by refusing to buy the ordinary cheap seeds, sent out to sell in this way.

EARLY ORDERS.—It is essential that customers send us their orders as soon as possible after receiving this Catalogue, and thus avoid the rush incidental to the planting season.

ORDERS FROM NEW CUSTOMERS, to insure prompt attention, must be accompanied by remittance, or by satisfactory reference to some responsible house or person; otherwise we must send by express, C. O. D.

REMITTANCES may be made at our risk by draft, P.O. money order, express money order, or cash by express or in registered letter. Postage stamps may be sent for moderate amounts.

PLANTS AND SHRUBS cannot be sent C. O. D. unless we receive a remittance on account to guarantee acceptance.

FREE DELIVERY.—We send to any part of the United States all vegetable and flower seeds quoted in this Catalogue at packet, ounce, quarter-pound, half-pound and pound rates free of expense to the purchaser, by mail or express (at our option). All heavy seeds, including peas, beans, corn, clover seeds, seed grain, roots, etc., are quoted at net prices at our store. Purchasers desiring these by mail are requested to remit an additional amount sufficient to cover postage, at the rate of 8 cents per pound or 15 cents per quart. Particular attention is invited to this, as, when omitted, the cost of postage will be deducted from the amount received.

We deliver free by mail in Canada all vegetable or flower seeds ordered at packet, ounce, or quarterpound rates. For seeds in larger quantities, customers should remit 16 cents per pound for postage.

The large express companies now take shipments of seeds to points where the merchandise rate is over 50 cents per 100 pounds at a discount of 20 per cent from regular rates, charges prepaid or guaranteed.

ORDER SHEET.—In ordering, please use the order sheet which we send with each Catalogue—other order sheets will be furnished if desired.

BAGS are charged for at cost as follows:— $\frac{1}{4}$ -bushel and $\frac{1}{2}$ -bushel at 10 cents each; 1-bushel at 15 cents each; 2-bushel at 20 cents each.

NAME, ADDRESS, ETC.—Please be particular to give on each order your name and full address very plainly, giving your express and freight office, if different from post office; also state the mode of conveyance you prefer, whether express, mail or freight. In the absence of instructions, we shall select what we consider the most desirable way, but can assume no responsibility.

SITUATIONS FOR GARDENERS AND FARMERS. We have on our books the names of reliable men, experienced in all

branches of gardening. Also, men for second places and general work. If, at any time, our customers or others are in want of such men, they would do well to call upon or write us. No fees are ever charged.

SCHLEGEL & FOTTLER CO.'S SPECIALTIES FOR 1907

We include in this list, besides some valuable introductions from other leading houses, some varieties of special value not mentioned in our general list; some new introductions, also a few of our own specialties.

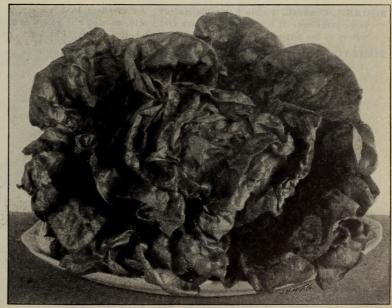

- BEANS, Sutton's Evergreen. One of the earliest dwarf Beans, bearing a great profusion of medium-sized pods.

 The characteristic which distinguishes it from all others is the unusual period during which the foliage remains green, enabling the plant to mature pods from the later blossoms. A really profitable Bean of fine quality. Pt. \$1.50.
- BEANS, Sutton's Perfection (Stringless). The pods of this variety are extremely fleshy and succulent, being almost round, and they remain in excellent condition long after ordinary beans become dry and tough. Of branching habit, which prolongs the time of bearing, and the pods are produced in great profusion. Pt. \$1.50.
- BEANS, Sutton's Dwarf Sugar (New). This variety produces a heavy crop of long, succulent pods, entirely stringless and very brittle, even when well advanced in growth. Delicious quality and quite early. Pt. \$1.50.
- BEET, Crosby's Egyptian. As an early variety it has no equal. It is much thicker than the original strain, quite as early, of better color and quality, besides being smoother. We have no hesitation in pronouncing this the best early Beet yet offered. For several years we have made a specialty of this excellent Beet. Pkt. 5 cts., oz. 10 cts., 1/4 lb. 30 cts., lb. \$1.
- CORN, Early Golden. Another specialty with us, and one which we recommend with the greatest confidence to all in search of the best Sweet Corn. We believe it excels all others in quality, being exceedingly sweet and delicious. It is early and has the admirable quality of remaining a long time in a tender condition without becoming hard or maturing. The color is a clear yellow, and while this may to some seem to be an objection at first, it ceases to be so upon the first trial. (See back cover.) Ears 10 cts. each; pkt. 10 cts., pt. 15 cts., qt. 30 cts.

CUCUMBER, Davis' Perfect. Mr. Davis, after experimenting and trying for several years to get a better strain of Cucumber, suitable both for forcing and for growing out-of-doors, feels that he has now succeeded, and offers this variety as being superior to any yet introduced. It combines color, shape, quality and productiveness. Its color

is a dark, glossy green; shape slim, symmetrical, with an average length of 10 to 12 inches. They never grow pussy, and hold their color until nearly ripe, when they turn white without a sign of a yellow streak. The quality is fine; the seeds soft when ready for the table; very tender, brittle and of exceptionally good flavor. It is as early as the earliest strain of whitespined, and greatly exceeds in yield any other sort. It is also a good shipper, holding its color and brittleness long after being cut. Pkt. 10 cts., oz. 25 cts., 1/4lb. 75 cts.

Please find check enclosed to balance account, and allow me to thank you for the prompt and courteous treatment we are given by your firm, and congratulate you upon the continued good quality of goods sent out.—
JOHN W. SHIRLEY, Lawrence. Mass.,
Oct. 31, 1906.

MAY KING LETTUCE (see page 19)

LETTUCE, Ideal. A new forcing variety, claimed by the introducers to be for forcing purposes what the May King is for garden culture, the best in every respect. Heads of perfectly rounded form, and unsurpassed for firmness. Pkt. 25 ets.

DAVIS' PERFECT CUCUMBER (see page 1)

LETTUCE, May King. This variety, introduced from Germany and sold by us the past two seasons, proves to be of exceptional value. Its great peculiarity, aside from exceptional quality, is its extremely rapid growth. Pkt. 5 cts., oz. 20 cts., ¼lb. 60 cts. (See illustration, page 1.)

LETTUCE, Sutton's Little Gem Cos.

An entirely distinct Cos Lettuce, and a most valuable dwarf, compact variety.

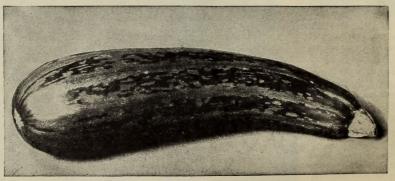

Very dark green; solid, small, crisp; slow in running to seed, and of delicious quality. Pkt. 25 cts.

Mr. E. O. Orpet writes under date of June 26: "I want you to see a good Lettuce, the best thing in years—Sutton's Little Gem Cos. Cut one open and try it." We tried it and found it all Mr. Orpet claimed.

PEA, Admiral Dewey. Remarkably

healthy and vigorous, producing an abundance of pods of the largest size, sometimes 6 inches in length, well filled with peas of the largest size, tender and of fine quality. Doubtless one of the best in the class of long-vine, large-podded wrinkled Peas. Pkt. 10 cts., qt. 30 cts., pk. \$1.75.

- PEA, Sutton's Centenary Marrowfat. A second-early Pea, with pods of immense size and peas of delicious flavor. A strong, vigorous grower, much less liable to mildew than many others. Pt. \$1.50.
- PEA, Sutton's Excelsior. Same habit of growth as Nott's Excelsior, bearing very large, broad pods filled with large peas and in the front rank for earliness, with larger and handsomer pods than any dwarf Pea yet introduced. Height 12 inches. Pkt. 10 cts., pt. 20 cts., qt. 35 cts., pk. \$2.
- **PEA, Sutton's Masterpiece.** A superb main-crop Pea with very large pods, usually produced in pairs. Although of enormous size, the pods in some instances measuring nearly 7 inches, yet this variety is highly prized for its delicious flavor. Pt. \$1.50.
- SQUASH, Cocozell. Italian Vegetable Marrow. An excellent bush variety, very little known, although introduced some years ago. It is oblong, with dark green skin, mottled with yellow and pale green. Of delicate flavor, not as watery as the Summer Crookneck, and of much better quality. Pkt. 5 cts., oz. 10 cts., ¼lb. 30 cts.
- TOMATO, Improved Belmont. We can recommend this variety with the greatest confidence, especially to those in want of an early variety for market. Very early, solid and smooth (in this latter respect being unlike most early sorts). Of bright scarlet color, medium size, and yields well. Pkt. 10 cts., oz. 40 cts., 1/4 lb. \$1.25.

COCOZELL SQUASH

FLOWER SEED NOVELTIES AND SPECIALTIES FOR 1907

Descriptions by the Introducers. See pages 41 to 72 for Standard Sorts

- 473 AQUILEGIA haylodgensis delicatissima.

 Hybrid Columbine with long, satin-rose spurs, the color passing imperceptibly into the delicate light yellow of the crown. Pkt. 25 cts.
- 827 ASTER, Hercules' White. New branching class, 1½ to 2 feet high, producing on strong stems enormously large, long-petaled flowers, 6 inches or more across, which have a strong resemblance to the finest show flowers of the Japanese chrysanthemums. Pkt. 25 cts.
- 855 ASTER, Invincible. Light crimson. A fine color of this superior type. Pkt. 10 cts., oz. \$3.
- 1061 ASTER Unicum, Pure White. Grand variety about 2 feet high, and of branching habit. The flowers are very large, with long, narrowly channeled petals, gracefully curled and twisted Pkt. 15 cts.
- 1308 **BEGONIA gracilis luminosa.** Perpetual-flowering section with satiny brownish red foliage, and bright deep searlet flowers 1 to 1½ inches in diameter. Pkt. 25 ets.
- 1371 BELLIS PERENNIS, Monstrous Double Rose. Large double flowers, which measure 3 to 4 inches in diameter, and of a very bright rose-color. Pkt. 25 cts.

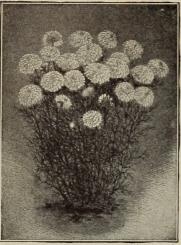

DIANTHUS, SNOWDRIFT

ASTER HERCULES

- 1372 BELLIS PERENNIS, Monstrous Double
 White. Like the preceding, except in color.
 Pkt. 25 ets.
- 2033 CHRYSANTHEMUM Inodorum, Bridal Robe. Feathery foliage and extra double pure white flowers. Excellent for bedding and growing in pots. 10 inches high. Pkt. 25 ets.
- 2271 COREOPSIS, Tom Thumb Beauty. Annual sort. 6 to 8 inches high and covered with showy golden yellow flowers with crimson center. Pkt. 10 ets.
- 2272 COREOPSIS, Tom Thumb Crimson King. Rich dark crimson flowers. Fine companion to the preceding. Pkt. 10 cts.
- 2496 **DAHLIA, Colossal Mixed.** Enormous single and semi-double flowers often 8 inches and over in diameter; the petals are quite broad, giving the flowers the appearance of single Chinese pæonies. Pkt. 20 cts.
- 2731 **DIANTHUS laciniatus, Snowdrift.** Large-flowered Japanese annual Pink, with beautifully fringed, very double flowers, 3 inches and over in diameter, and of the purest snow-white. Useful for cutting. Pkt. 15 ets.

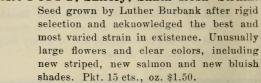

CHRYSANTHEMUM INODORUM (See page 3)

- 2745 DIANTHUS latifolius, Double Mixed. Annual Pink, like the Sweet William in habit but the foliage is broader and the flowers double the size in rose, crimson, maroon, etc. Pkt. 10 cts.
- 3733 IMPATIENS Holstii, Hybrids Mixed. New and beautiful colors of this large-flowering sort varying from white with red eye to rose-carmine and violet. Pkt. 25 cts.
- 4088 LYCHNIS lagascae rosea. A most pleasing dwarf perennial with bright rose-colored flowers in May and June. Excellent for rockeries, edges, etc. 4 inches. Pkt. 20 cts.
- 4424 MYOSOTIS alpestris, Indigo. Fine deep blue Forget-me-not. Pkt. 10 cts., oz. \$1.50.
- 4869 NICOTIANA Sanderae, Hybrids Mixed. The great beauty of Nicotiana Sanderæ is quite eclipsed by these new hybrids. The flowers are sweet-scented and range from pure white to deep scarlet, purple, etc. Pkt. 10 cts.

- 5196 POPPY, Admiral. Single paony-flowered Poppy of surprising beauty. The flowers are glistening pure white, with a broad band of brilliant scarlet around the top. Pkt. 20c.
- 5296 POPPY, Shirley, Santa Rosa Strain.

5799 PRIMULA obconica grandiflora robusta. The flowers, nearly 2 inches

across, are freely produced. The large umbels are borne on numerous strong stalks and mostly of a lilac color, but varies to rose and purple. Pkt. 25 cts.

IMPATIENS HOLSTII HYBRIDS

POPPY ADMIRAL

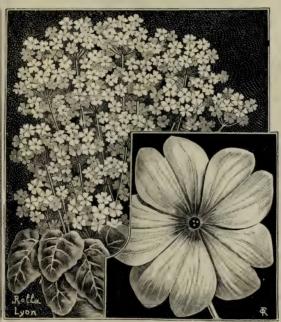

6238 SCABIOSA Japonica. Beautful hardy perennial, about 3 feet in height, with large mauve or lavender-blue flowers 2 inches and more across, on stout stems 15 to 20 inches long; blooming continuously from June till autumn; excellent for cutting. Pkt. 25 cts.

6241 SCHIZANTHUS Grahami niveus. Now variety, with snow white flowers and bright green, finely cut foliage; it grows about 2 feet high; a continuous bloomer. If sown in April it will bloom from June till frost. Pkt. 10 cts.

6244 SCHIZANTHUS Wisetonensis. Large, rosecolored flowers. Pkt. 25 ets.

6288 SILENE compacta fl. pl., Peach-Blossom.

Very double flowers of a delicate peach-blossom color; very effective for groups or edgings. Pkt. 15 ets.

PRIMULA OBCONICA GRANDIFLORA ROBUSTA (See page 4)

SWEET PEAS

6514 **Bolton's Pink.** Large pale pink. Pkt. 10 ets., oz. 50 ets.

6583 E. J. Castle. Large, rich carmine-rose with salmon shading. Pkt. 25 cts.
6602 Frank Dolby. Largest and finest pale blue.

2 Frank Dolby. Largest and finest pale blue.
Pkt. 25 cts.

6674 **Miss H. C. Philbrick.** Fine bright blue. Pkt. 10 ets., oz. 50 ets.

6683 Mrs. Alfred Watkins. Large, superb pale pink, wavy standards. Pkt., 25 cts.

6708 Nora Unwin. Largest and finest pure white to date. Pkt. 25 cts.

6728 Queen Alexandra. Finest pure scarlet. Pkt. 25 cts.

6782 **Sybil Eckford.** Primrose, shaded pink and terra-cotta. Pkt. 25 cts.

See pages 69 and 70 for other varieties

5864 PRIMULA, Sutton's Double Mixed. 75 ets.

SCABIOSA JAPONICA

THE AUTUMN
Photograph taken September 16, 1905

This plant was grown in the open field, potted and photographed September 26

New Everbearing Strawberries

PAN-AMERICAN. A very strong, healthy plant, with no signs of rust or blight, and a most persistent bloomer from May till November. It will bear fruit when the common varieties bear, but it is better to nip off the first

AMERICA GLADIOLUS

stems as they appear, so that the plant will grow stronger and bear a larger crop after the others are gone. Very soon after the first stems are nipped off more will appear, and they will continue to appear all summer and fall. In twenty-five or thirty days from the time we stop removing the blossoms we will get ripe fruit. The fruit is of good size and nice quality. They make large plants, and some single plants will bear a quart of fruit or more. The young runner plants when three weeks old will blossom and bear. Plants set in the spring will bear a full crop in the fall. With a little protection on cold nights, they will continue to bear until almost Thanksgiving time. 35 cts. each, \$2.50 per doz., \$15 per 100.

THE AUTUMN. A strong, healthy, vigorous plant, which makes a lot of runners. The parent plant produces an enormous crop of medium-sized, handsome fruit, perfect in shape and very dark colored in August, September and October. As this is a pistillate variety, it should have some Pan Americans grown with it to fertilize its blossoms. \$1 for 6, \$2 per doz., \$10 per 100.

New Gladiolus

AMERICA. This new, beautiful and useful variety is offered for the first time. It is a vigorous and healthy grower, with a strong, erect spike of the largest flowers, in color (much like Enchantress Carnation) a beautiful soft pink, slightly tinged with lavender; excellent for cutting. 20 cts. each, \$2 per doz.

PRINCEPS. This new hybrid variety is the result of crossing the Gladiolus cruentus with a large Gladiolus Gandavensis, and produces a spike 4 feet high, with sixteen to twenty-one blooms 6 to 7 inches in diameter, of a true salvia-scarlet color, with white feather. A truly magnificent and most striking variety. It has received several awards. 25 cts. each, \$2.50 per doz.

Lilium Philippinense

Very large, pure white, trumpet-shaped, gardenia-scented Lily from the Philippines, about 2 feet high, with wiry stalks, long, narrow leaves, and producing one to three flowers in ten to twelve weeks when planted outside.

Mammoth Bulbs, 3 to 6 in. in circumference. 25c. each, \$2.50 per doz., \$15 per 100.

A special importation for summer blooming to arrive first of March

SCHLEGEL & FOTTLER CO.'S CHOICE VEGETABLE SEEDS

For over sixty years our seeds have maintained their superiority for purity and general excellence, and we number among our customers the best and most prominent gardeners, and many of the largest buyers in New England

FREE DELIVERY We send to any part of the United States all Vegetable and Flower Seeds quoted in this Catalogue at packet, ounce, quarter-pound, half-pound and pound rates, free of expense to purchaser, by mail or express (at our option). All heavy seeds, including peas, beans, corn, clover seeds, seed grain, roots, etc., are quoted at net prices at our store. Purchasers desiring these by mail are requested to remit an additional amount sufficient to cover postage, at the rate of 8 cts. per lb. or 15 cts. per qt. Particular attention is invited to this, as, when omitted, the cost of postage will be deducted from the amount received.

We deliver free by mail in Canada all Vegetable or Flower Seeds ordered, at packet, ounce or quarter-

pound rates. For seeds in larger quantities, customers should remit 16 cts. per lb. for postage.

The large express companies now take shipments of seeds to points where the merchandise rate is over

50 cts. per 100 pounds, at a discount of 20 per cent from regular rates, charges prepaid or guaranteed.

We endeavor to execute all orders carefully and promptly (usually the day they are received or the day following), and in the press of business, errors may occur, although we try to guard against them; in such cases we should be notified, when we will make prompt and satisfactory correction.

ARTICHOKE (Mrtifchofe)

The seed should be sown in April, in a good soil, in drills 10 to 12 inches apart, and about one inch deep. Protect the plants from freezing during the winter, and the following spring separate and transplant, setting them 3 feet apart in moist soil. Upon the approach of cold weather the stems and leaves should be cut away and the bed covered so as to prevent freezing. With careful cultivation a bed should last three or four years. The suckers, or offshoots, from established plants, may be used for propagating, instead of sowing seed. The plant is a hardy perennial, growing 3 to 4 feet high, with numerous branches. Just before the flower is ready to open, the head is in condition to boil.

Green Globe. The best for general use. Pkt. 5 cts., oz. 30 cts. Plants, 20 cts. each, \$2.25 per doz.

JERUSALEM ARTICHOKE (Erbartischofe)

If by mail, add 10 cts. per quart to cover postage

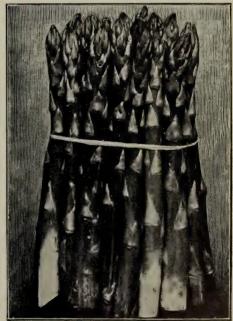

A species of sunflower (Helianthus tuberosus). A tuber that thrives well upon light, dry soil, and is cultivated for feeding to sheep and swine, the tops also being sometimes cut and cured as a dry fodder. The tubers are also used for pickles. Qt. 20 cts., pk. \$1.

ASPARAGUS (Spargel)

One ounce to 60 feet of drill

Asparagus roots may be purchased in the spring, or may be grown from seed sown in April or May, in good soil, in drills 12 to 14 inches apart. The permanent bed should be made very rich with well-rotted manure, and thoroughly worked over to a depth of nearly 2 feet. The Asparagus roots (either one or two years old) are to be transplanted into this bed, setting them in rows 3 or 4 feet apart, leaving about 18 inches between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction, to keep the roots from running together. Cover lightly at first, gradually filling the trenches as the plants begin to start; the crowns of the roots should be about 6 inches below the level of the bed. Avoid location near trees, particularly large trees, or their roots will soon take possession of the ground. All difference in varieties of Asparagus is probably the result of care in

	selection and natural adaptation of soils.	Pkt.	Oz.	1/alb.	
-	Columbian Mammoth White. Pure white	2 200	011,	/410.	
	stalks. Large	\$0 05	\$0 10	\$0 30

	ject to blight	05	10	25	

ASPARAGUS

ASPARAGUS ROOTS

Conover's Colossal and Palmetto. Strong 2-year old plants. Each, 75 cts. per 100, \$6 per 1,000; if by mail, add 40 cts. per 100. Special quotations will be given for roots in large quantities.

BEANS

ENGLISH (Groffe Englische Pohnen)

If by mail, add 15 cts. per quart to cover postage

English Broad Beans are very hardy and should be planted in the spring as early as the ground will permit. Plant sparingly, in rows 2 feet apart, in good soil, and cultivate only in fair weather, and when the foliage is dry. As the pods get formed top the plants, thus avoiding too much running to vine.

Broad Windsor. Best sort for general use. Pkt. 10 cts., qt. 30 cts., pk. \$2.

DWARF, or BUSH

(Buich Bohnen)

One quart will plant 100 feet of drill: 11/2 bushels will plant one acre

If by mail, add 15 cts. per quart to cover postage. We furnish 10 cent packets of all varieties of Beans

Plant in rows 2 or 3 feet apart, dropping the beans 3 inches apart and covering 2 inches. They thrive upon light soils, which should be carefully prepared and manured lightly. Being tender, they should not be planted until frosts are past, as warm soil is needed for their germination. For succession, make plantings every two weeks until September.

stringless	15	30	2 00

BEANS, POLE or RUNNING (Stangen Bohnen)

One quart will plant 150 hills

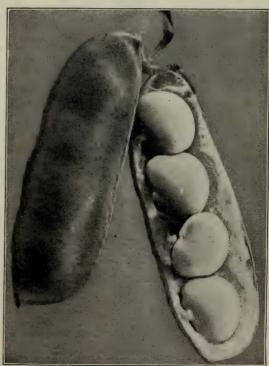

If by mail, add 15 cts. per quart to cover postage

The planting of the various sorts of Pole Beans should be delayed a week or more after the first planting of the early dwarf sorts. The Limas and Sievas, being very tender, will do better if not planted in the open ground before the last of May. Plant in hills about 3 feet apart and 1 to 2 inches deep, using five or six seeds to each hill, and set a pole firmly in the center. Manure liberally in the hill with well-composted fertilizer. Thin the plants, leaving three in each hill. Many cultivators consider it best, in planting Limas and other flat Beans, to place the eye down, claiming that in this way that they will germinate more quickly.

NORBITON GIANT MANGEL-WURZEL

BEET (Runkel Rübe)

One ounce will sow 50 feet of drill, 5 or 6 pounds for an acre

A rather light soil, well enriched, is best suited to the cultivation of the various Beets. The mangels and sugar-beets in particular require very liberal manuring. For an early crop of table Beets, sow the seed as early as the ground is in condition to work; light frosts will not injure the young plants. For a main crop, sow the first of May; and for winter Beets, during the first two weeks in June. Sow in drills, 12 to 15 inches apart, and about one inch deep, pressing the earth firmly upon the seed,—a very important matter. Use about six pounds of seed per acre. Thin out when the plants are large enough. The varieties for table use should be left 4 or 5 inches apart, while the mangels and sugar-beets should stand 10 to 12 inches apart in the row.

left 4 or 5 inches apart, while the mangels and sugar-beets s inches apart in the row.

BORAGE

Plant early in light soil, and when plants are well started transplant in drills one foot apart. Sowing should be made at intervals, as the leaves are good only when young. Used as a salad or may be boiled like spinach. Pkt. 5 cts., oz. 20 cts., 1/4 lb. 60 cts.

BROCCOLI (Spargel Rohl)

This plant is very closely allied to the cauliflower, the variation being very slight. It is generally considered rather more hardy, however. In growing Broccoli, a seed-bed should be prepared, and the seed sown in May. The plants will be ready to transplant late in June, or early in July, and should be set in very rich, mellow ground, in rows about $2\frac{1}{2}$ feet apart, leaving 18 inches between the plants. In cool, moist fall weather it thrives well.

BRUSSELS SPROUTS

(Sproffen Rohl)

A species of the cabbage family, which produces miniature heads from the sides of the stalk. These heads are a great delicacy, boiled in the same way as cauliflower. The seeds should be sown about the middle of May, in a seed-bed, and the plants afterward set in rows 2 feet or more apart, and cultivated like cabbage. This vegetable does not require extremely high cultivation, however. It is ready for use late in autumn, after the early frosts.

Witloof. Plant in May or June in drills. Thin to 6 inches apart, and during the fall gradually bank			
up same as celery. The blanched stalks make delicious salad	05	10	30

CABBAGE

CABBAGE (Ropf-Rohl)

One ounce of seed produces about 3,000 plants

Early varieties are grown from seed sown in hotbeds in February or March, only moderate bottom-heat being required. Transplant into other frames, without much, if any, bottom-heat, as soon as the plants show the fourth leaf. In April, or as soon as the ground can be easily worked, set out in rows 3 feet apart, and about 18 inches between the plants. The ground should be thoroughly stirred with cultivator and hoed every week till the plants cover the ground. For a fall crop, sow in the open ground in May, in hills the proper distance apart, using a liberal quantity of manure in the hill, besides that which is plowed in; thin out to one good plant in each hill. In the same way crops may be grown to lay in for the winter use, planting seed as late as July 1. Seeds can also be sown in shallow drills, and, when the plants are large enough, can be transplanted, setting the plants in rows 3 feet apart and 2 feet apart in the row. If the young plants are troubled with the Cabbage fly, sprinkle them with tobacco dust, air-slaked lime, slugshot, or wood ashes, while the dew is on them. To keep off the Cabbage worm, sprinkle with Dalmatian insect powder or slugshot.

Pkt. Oz. 1/41b.

desirable form for krout, as well as for all other purposes for which Cabbage is used	10	30	1 0	10

CARROT (Möhre)

One ounce will sow 100 feet of drill. Three pounds will sow an acre

A rather light, sandy loam, deeply tilled, is the best, and upon such soil, if it has been liberally fertilized the previous year, a good crop may be grown without much, if any, additional manure. Make the surface smooth, and sow in drills about 14 inches apart, and about half an inch deep, thinning the plants, when large enough, so as stand about 3 to 4 inches apart. April or May is the proper time to sow, varying the time accordingly as an early or late crop is wanted. Good crops have been grown from sowings as late as the tenth of June. Early weeding is very important. Chantenay Half-Long Stump-rooted. Similar to Nantes, with broader shoulder\$0 05 \$0 10 \$1 00 Danvers Half-Long. FOTTLER'S CHAMPION ERFURT CAULIFLOWER

CAULIFLOWER (Blumen Rohl)

One ounce of seed produces about 3,000 plants

Cauliflowers require very high cultivation, even more so than cabbage, and plenty of moisture. There is no more delicious vegetable grown. Coldframe plants are probably the best and hardiest for early crops; the frames, however, need rather more protection during cold nights than is required for cabbage plants. Seed sown in hotbeds in February will produce plants that are not much, if any, inferior to coldframe plants. They should be transplanted once before setting in the open ground, and also should be gradually hardened by exposure; in this way they may be in condition to set out as early in April as the ground will permit. Set the early sorts about 2 feet by 15 inches, and cultivate the same as cabbage. Where irrigation is practicable, great advantage is thus obtained during a drought. For late Cauliflowers, sow seed in open ground, from the middle of May to the middle of June, in hills the same as directed for late cabbages. When the heads are forming, tie the leaves together at the top, thus avoiding the discoloration by exposure to the sun.

Cauliflower Plants. Ready in June. Doz. 25 cts., 100 \$1.50.		

CELERY (Sellerie)

One ounce will produce about 4,000 plants

The proper time to sow is early in April, transplanting about the first of June. Set in rows 3 feet apart, and about 12 inches between plants in the row. Some gardeners trim off the tops a little, while the plants are small, to make them more stocky. Keep down all weeds, and, as fall approaches, draw earth up to the plants, keeping the stalks well together. This earthing-up is continued at intervals, until only the leaves appear above the soil. When well blanched it is ready for use. For winter use it is usually placed in frames and covered with earth and litter, or stored in cool cellars. Comparatively few soils are suited to Celery culture. Rich, mellow soils of a sandy nature are best, while soils that settle and become hard after rain are unsuitable. The seed, being very small, should be covered very lightly, and the earth firmly pressed down upon it.

CELERY, continued

Boston Market. The dwarf, branching variety grown so extensively about Boston. It is unequaled by any other sort, being solid, crisp, and of excellent flavor; its compact, dwarf habit allows closer planting and requires less earthing-up than taller sorts. Pkt. 10 cts., oz. 40 cts., 1/41b. \$1.25.

Fin de Siecle. A large, solid, crisp winter variety. Keeps well. Pkt. 10 cts., oz. 30 cts., ¼lb. 80 cts.

Giant Pascal. Of a fine, nutty flavor, entirely free from any bitter taste. It grows about 2 feet high; the stalks are very broad, thick and crisp. It bleaches with but slight earthing-up and very quickly. A valuable variety, for both second early and midwinter use. Pkt. 5 cts., oz. 25 cts., ½1b. 60 cts.

Henderson's White Plume. The stalks and portions of inner leaves and heart are naturally white; needs very little earthing up; crisp and of pleasing nutty flavor, while its white feather-like foliage is very ornamental. Pkt. 5 cts., oz. 25 cts., ½ lb. 60 cts.

Paris Golden Yellow (Self-blanching). This Celery has become a standard variety. Its fine dwarf form, rapid growth, extreme earliness, superior flavor and keeping qualities, rich golden color and slight trouble in blanching, all recommend it. It has shown no signs of blight or rust where all others were more or less affected. Pkt. 10 cts., oz. 50 cts., ½1b. \$1.50.

Pink Plume. Similar to White Plume, except that the stalks are delicately marked with pink. It also has the rich, nutty flavor of the red Celeries. Pkt. 5 cts., oz. 25 cts., ½lb. 60c.

Rose-ribbed Golden Self-blanching. A sport from the Paris Golden Yellow. Very solid, with rose-tinted ribs. Pkt. 10 cts., oz. 35 cts., ½lb. \$1.

Besides the above varieties, we offer the following at a uniform price of pkt. 5 cts., oz. 25 cts., ¼1b. 60 cts.:

New Rose, Winter Queen, Evans' Triumph, Golden Heart.

CELERY PLANTS. Ready in June and July. Paris Golden Yellow, Giant Pascal, Boston Market. 100 75 cts., 1,000 \$6.

CELERIAC (Anoll Sellerie)

A variety of Celery with roots of turnip shape. It is grown in the same manner as ordinary Celery, but may be set closer—about 18 inches by 6 inches. But little earthing-up is required.

PARIS GOLDEN YELLOW CELERY

about 18 inches by 6 inches. But little earthing up is required.

Can be kept in winter in same way as other celery. It is eaten as a salad, the roots being boiled and sliced and used with vinegar.

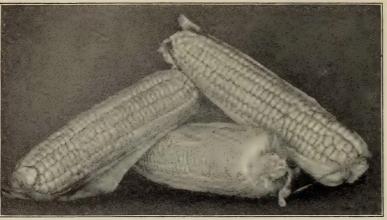

Erfurt Giant. The best sort. Pkt. 5 cts., oz. 20 cts., 1/4lb. 60 cts.

CORN, Sweet or Sugar (Buder Mais)

One quart will plant about 200 hills. Ten quarts to the acre If by mail, add 15 cts. per quart for postage

Plant in any good soil, in hills 3 or 4 feet apart each way, covering early plantings one inch, and later plantings 1½ to 2 inches For early use, plant about the middle of May, and follow with successive plantings till July. Use manure plowed in, or in the hill, or both.

The stalks are valuable 1 25 Pa Sweet Corn for Fodder. Stowell's Evergreen, specially for fodder..... 75

CORN SALAD, or FETTICUS (Acterialat)

One ounce will sow 100 feet of drill

Grown for use as salad. Sow very early in the spring, in rows a foot or more apart. In six or eight weeks it is ready for use. Large-seeded, pkt. 5 cts., oz. 10 cts., 4lb. 30 cts.

CUCUMBER (Gurfe)

One ounce will plant about 50 hills; one to two pounds to the acre

To obtain early Cucumbers, and at the same time avoid most of the annoyance of the striped bug, it is a good plan to plant the seeds about the first of May in frames, without much bottom heat. Small sods turned over may be placed close together in the frames, and upon these the seeds may be planted; or small pots may be plunged into the soil in the frames, and a few seeds placed in each. In three or four weeks these may be transplanted into open ground. Set, without disturbing the plants, each piece of sod into hills made 3 or 4 feet apart each way. When the plants have become well started, thin out, leaving four of the strongest in each hill. Pick all Cucumbers when large enough for use, whether needed or not, for if left on the vine to ripen they will cease to be productive. The seeds may be planted in the hills late in May, making the crop somewhat later. Use dry plaster or an infusion of powdered in

W	white hellebore in water, to destroy the striped bug. For pickles, plant during the last two weeks in Jun	ne.			101

Early Cluster. Grows in clusters; bluish green in color; an early sort, of medium size	05	15	40
Early Frame, or Short Green. An early sort; short, about 5 inches	. 05	15	40
Early Russian. The earliest variety, but 3 or 4 inches long. Its best quality is its earliness	05	15	40
Emerald. Vines vigorous and productive. Fruit dark green, spineless, and of good quality	10	20	60
Everbearing (Thorburn). Small and productive. Excellent for pickles	05	15	50
Forcing White-spined, Private Stock. One of the most valuable yet offered for forcing. It is also excellent for outdoor culture. It is somewhat longer than our Arlington Extra White-spined and remarkably uniform in shape; color very dark green; flavor the best. It is also prolific. The seed we offer is grown by the originator, one of the most careful and painstaking gardeners in	,		
Social no state to grant of the state of the		* 00	0 00

Improved White-spined. Variety generally used for openair culture; medium length; dark green color; crisp and of excellent flavor. Pkt. 5 cts., oz. 15 cts., 1/4lb. 50 cts.

this vicinity

Japanese Climbing Green. An early prolific variety, highly recommended by some. Fruit thick, tender and of delicate flavor, with white flesh. Pkt. 10 cts., oz. 25 cts., 1/4lb. 75 cts.

Long Green. A popular long variety for pickles. Pkt. 5 cts., oz. 20 cts., 1/4lb. 50 cts.

PRIVATE STOCK WHITE-SPINED CUCUMBER

Tailby's Hybrid. A cross between the White-spined and an English Frame variety, combining the hardiness of the former and the beauty and size of \$0.50 the latter White Pearl. The best white variety

ENGLISH FRAME VARIETIES

The following varieties are best for forcing for private use. They attain a length of from 15 to 30 inches, and are very tender and delicate. Rollison's Telegraph, Carter's Model, Tender and True, Rochford's Market. B Packets containing ten seeds, each, 25 cts.

DANDELION (Löwenzahn)

One ounce will sow 200 feet of drill. Two pounds will sow an acre

Extensively used as early spring greens, and considered very healthful. Sow seed in May or June, in any good soil, n drills 15 inches apart, upon beds made smooth with the rake. Cover very lightly, and press the earth firmly upon the seed. Cultivate during the summer to keep down the weeds. Cover with litter upon the approach of severe weather, and emove the covering early in spring.

Thick-leaved French. The best variety. Pkt. 10 cts., oz. 50 cts., 1/41b. \$1.50.

ENDIVE (Enbivien)

One ounce will sow 150 feet of drill

For early use, sow in April or May; but, as it is mostly used quite late in autumn, it will be in time if not sown pefore June or July.

Any good soil will suit Endive, and it does not require much manure. When large enough, transplant into rows 15 nches apart, setting the plants 8 or 10 inches apart. As it is not much used, except as a salad, it needs to be thoroughly planched. When of full size, tie all the leaves into a bunch at the extreme top; in a few weeks it will be ready for use. It can be blanched more quickly and thoroughly by placing boards so as to exclude the light from it.

Moss Curled. More finely curled, and a heavier and more dense plant than Green Curled 05 Broad-leaved Batavian (Escarolle). A looser-growing sort, sometimes used in soup; not as 60

Mr. Alexander Adam, gardener for Alfred G. Vanderbilt, Esq., Oakland Farm, Newport, R. I., writes us under date of October 17 906: "The bulbs, seeds and plants we have had from you this season have been very satisfactory, especially the Franklin Park Lawn seed, which we used on ten acres of new land,"

EGG-PLANT (Gierpflange)

One ounce will produce about 1,000 plants

Egg-plants require a light, warm soil, and, being very delicate and tender, must not be set out too early. They require a high temperature at all times. Sow in a hot-bed about the first of April, with a good steady bottom-heat, and

BLACK BEAUTY EGG-PLANT

KOHLRABI

delay planting out until such time in June as is necessary to avoid a temperature much below 70°. Set 2 to 3 feet apart each way, according to the nature of the soil, more room being needed if the soil is very fertile; a delicious vegetable when properly cooked.

Black Beauty. Very early and as large as New York Oval. Rich purplish black color Pkt. 10 cts., oz. 40 cts., 1/4 lb. \$1.25.

Black Pekin. A globe-shaped variety, of superior excellence; deep glossy black fruit; solid and quite early. Pkt. 10 ets., oz. 40 ets., ¼1b. \$1.25.

Early Long Purple. An early variety, of longer shape than any other; color deep purple; some lighter, with occasional stripes of yellowish white. Pkt. 10 cts., oz. 25 cts., ¼lb. 75c.

New York Improved Oval Purple. The best sort for general culture, and leading market variety; fruit large, oval or heart-shaped. Pkt. 10 cts., oz. 40 cts., ¼1b. \$1.25.

Plants ready in June. New York Improved. Per doz. \$1.

KALE, or BORECOLE (Blätter Rohl)

One ounce will sow about 200 feet of drill

For fall use sow early in May, in a prepared bed, and transplant in June, setting the plants and cultivating in the same manner as for cabbage. A strong soil, well manured, is required. There are many varieties and all are good—more delicate than cabbage, when boiled, the quality being improved after a light frost. They should receive more general attention.

Dwarf Green-curled Scotch. Very dwarf, with numerous leaves which are long, deep green in color and very much curled. An excellent variety for spring sowing. Pkt. 5 cts., oz. 10 cts., lb. \$1.

Dwarf Purple-curled, or Brown-curled. Similar to the green-curled, except in color, Pkt. 5 cts., oz. 10 cts., lb. \$1.

Large-seeded Spring. This variety is cultivated only for early greens, therefore should be sown as early as possible, in rows about 15 inches apart, in good rich soil. Pkt. 5 cts., oz. 10 cts., lb. 30 cts.

Winter, or German Greens (Sprouts). Should be sown in August or early in September, in rows a foot apart, and treated the same as spinach. It makes excellent spring greens. We offer a very choice strain of this variety. Pkt. 5 cts., oz. 15 cts., lb. 80 cts.

KOHLRABI (Rohirabi)

One ounce will sow about 200 feet of drill

Sow in May or June, in rows about 18 inches apart, and thin out the plants to about 12 inches apart in the row. Ordinary soil, with a moderate fertilizing, is all that is required for growing Kohlrabi. Use the hoe frequently to keep down weeds. This vegetable appears to be intermediate between turnip and cabbage, and has to a certain extent the flavor of both. The bulb that forms upon the stem just above the ground is fit to use when about half grown; when mature it becomes hard and fibrous. It is boiled and served like turnips. An excellent vegetable and should be grown in every garden.

Early White Vienna. The variety most in demand; greenish white outside, with clear white flesh. Pkt. 5 cts., oz. 25 cts., ½1b. 60 cts.

Early Purple Vienna. Does not vary from the Early White, except in color. Pkt. 5 cts., oz. 25 cts., 1/4 lb. 60 cts.

MESSRS. CLAPP & CRANE. of North Scituate, Mass., sent us Oct. 16, a barrel box of Cauliflowers from which our illustration was taken (see page 14). They wrote us at the time that this was a fair sample of 28,000 plants, grown from eight ounces of Champion Erfurt Cauliflower seed purchased from us; they were then making an average sale of 425 boxes per week of No. 1 Cauliflowers.

LEEK (Lauch)

One ounce will sow about 100 feet of drill

Leeks require a very rich, mellow soil, and a liberal dressing of well-composted manure. Sow the seed in April in rows a foot apart, and transplant in July. Land that has borne an early crop of pens, cabbages, etc., may thus be made use of for a second crop; but additional manure should be applied before setting out the Leeks. They should be set quite deep, and in rows 15 inches apart, with 6 inches between the plants. Later in the season, draw earth up around the plants to blanch them.

Giant Carentan. An extra large variety. Pkt. 5 cts., oz. 30 cts., ¼lb. 75 cts.

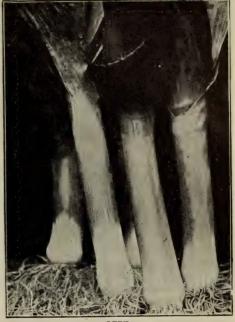

Large Rouen. Leaves dark green, broad and thick; remains a long time in good condition; it is also best for forcing. Pkt. 5 cts., oz. 30 cts., ¼lb. 75 cts.

Long Winter. A large sort; grows quite long; best for general use. Pkt. 5 cts., oz. 25 cts., 10. 60 cts.

LETTUCE (Lattick Salat)

One ounce will produce about 4,000 plants

Lettuce is a plant of most simple culture when grown in the open air. It requires rich soil, plenty of well-rotted manure, and abundant moisture. With these conditions its growth is vigorous and rapid, and, to be crisp and tender, it should be grown quickly. Seed may be sown in a frame in February and March, not much bottom heat being required. The plants may be set out as early as the ground can be worked, as light frosts will not injure them. Set in rows about 18 inches apart, leaving 8 or 10 inches space between plants. For successive crops, sow every two weeks up to August.

WATERMELON (2)

(Waffermelonen)

One ounce will plant about 30 hills. Four pounds will plant an acre.

Melons of all sorts should be planted on rather a light, sandy loam, a gentle slope toward the South being desirable. Make hills about 8 feet apart each way, and put in each a good shovelful of well-composted manure; press it down and cover with earth. Upon each hill plant six or eight seeds about half an inch deep. The middle of May is early enough for planting in open ground; but the crop may be forwarded by planting in frames, as directed for cucumbers. Three plants should be left to grow in each hill. Destroy bugs and cultivate in same manner as for cucumbers.

Pkt.	Oz.	1/41b.
Burpee's Mammoth Ironclad. A large, fine melon of excellent quality and good flavor; flesh of		
a dainty red color, and more crystalline than the Cuban Queen; a splendid keeper and shipper\$0 05	\$0 10	\$0 25
Citron, for preserving. Is used for preserves only; is very hardy and productive	10	25

MARTYNIA (Gemfenbörner)

MUSTARD (Senf)

One ounce will sow 40 feet of drill

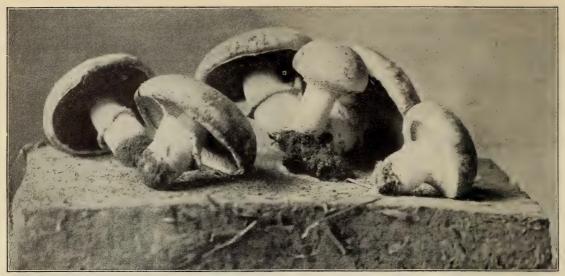

Cultivated to use as greens; often used mixed with cress. Sow in any ordinary soil in rows a foot apart, using plenty of seed. Successive sowings may be made from April to July; or, at any time during cold weather, it can be easily grown in frames. Chinese. Leaves nearly twice as large as the White. Flavor sweet and pungent. Best for salads.......\$0 10 \$1 00

White, or Yellow. Used largely for salads. The seed is also much in use to mix with pickles, in preserving cider, etc.....

MUSHROOM (@hampignon=Brut)

One pound English spawn will spawn about 6 square feet. One brick of pure culture will spawn 10 square feet If ordered by mail, add 8 cents per pound or 10 cents per brick for postage

Mushrooms may be grown in a great variety of situations, -a dark room, cellar, stable or elsewhere. Any place in which an even temperature of about 50° or 60° can be kept, is suitable. For materials for the bed, use fresh horse-manure, free from straw or chips, and good loamy soil. Some growers use the manure unmixed with loam, after first having well fermented it by alternately piling up and mixing for a few weeks; but it is undoubtedly better not to allow the manure to heat much before forming the bed. Use one-fourth to one-third loam; the rest manure. Mix very thoroughly and upon a dry, firm bottom make the bed of this mixture, about four feet wide, and of any desired length. Build it up evenly, pressing it down very firmly, and leave it about a foot high. It will shortly begin to heat. Use a thermometer to thrust into the bed, and note the temperature. When the heat has partially subsided, leaving a temperature of 70° to 80°, put in the spawn. Pieces from the size of walnuts to that of eggs are placed in the bed about a foot apart, deep enough to cover them well, and the manure is pressed down. Let it remain thus ten or twelve days; then cover with two inches of fresh loam, and make this moderately firm. The bed is finished by covering all with 4 or 5 inches of straw or other litter. Watering is not necessary, unless the surface of the bed gets very dry; in this event, moisten freely with water at a temperature of about 80°. In gathering the crop do not cut, but twist them off carefully, filling up the holes with loam to keep insects from the roots. In six or eight weeks from spawning the beds, Mushrooms should appear.

AMERICAN, PURE CULTURE MUSHROOMS

MUSHROOM, continued

Our space is too limited to present a complete treatise on Mushroom culture; and to those wishing to more thoroughly investigate the subject we can recommend several good works on the subject. Among them "How to Grow Mushrooms," by William Falconer. \$1 postpaid, and "Mushroom Culture" by Robinson. 50 cts. postpaid.

English Spawn (Bricks). Lb. 15 cts., 8 lbs. \$1, 25 lbs. \$2.50, 100 lb. \$9.

American, Pure Culture (Bricks). This new pure (tissue) culture spawn is made from spores taken from selected healthy Mushrooms, and produces larger crops than the English and produces them earlier. The Mushrooms are of vigorous growth, large and of fine flavor. The bricks are larger and lighter than the English. Bricks 25 cts., by mail 40 cts.; 5 bricks, by express, \$1.20, 10 bricks \$2, 25 bricks \$4.25, 50 bricks \$8, 100 bricks \$15, 140 bricks, a full case, \$19.50.

If any of you should happen to come out this way, I want you to call and see my Mushroom bed. I planted your American white and American brown spawn on August 27, and today the bed looks for all the world like those pictures you see with mushroom spawn ads. My old bed yielded more than a pound to the square foot. I am getting ready to spawn a new bed, but I wish you could see the one in bearing now.—(Signed) JOHN KIRKEGAARD, Gardener for J. J. Storrow, Esq., Lincoln, Mass., Oct. 18, 1906.

ONION (Swiebeln)

An ounce will sow 100 feet of drill. Four to five pounds to the acre

Select a clean, rich piece of land, upon which Onions were grown the previous year, if possible. Scatter broadcast a heavy dressing of well-rotted manure, and plough 6 or 7 inches deep as early in the spring as the ground can be worked; harrow and rake down to a fine even surface. Sow about four pounds of seed per acre, in drills a foot apart, and a quarter of an inch deep. If a seed-drill is used, it should be provided with a good roller to press the earth firmly upon the seed, particularly if the soil is very dry. Sow as early as possible. A few days' delay often makes a marked difference in the crop. Unless the plants stand very thick together, they need not be thinned out much, if any, as Onions will crowd each other, and find room to grow. Never allow the weeds to get ahead of the young plants: The weeds must receive early attention. Use a scuffle or wheel-hoe between the rows and pull out the weeds not reached by the hoe. When the tops are all down, and the Onions well formed, they may be pulled, and left on the ground for a fortingth or longer to dry (unless the weather be unfavorable), turning them occasionally with a wooden rake.

V	Adriatic Barletta. The earliest of all. Valuable both for table use and for pickling. Small size.\$0	Pkt. 05	Oz. \$0 20	\$4lb. \$0 60

ONIONS, continued

Southport White Globe. Quality similar to the White Portugal, but of globe shape, and rather I		1/4lb. \$0 75
Southport Yellow Globe. A fine large variety somewhat later than the Danvers		75
White Portugal, or Silver Skin. Very early; rather flat in shape; mild-flavored; does not keep as well as the yellow and red varieties. Yellow Cracker. The quality of this Onion recommends it especially for family gardens. While it		75
yields somewhat less than the globe varieties it is far superior in quality. It is very mild flavored and an excellent keeper	05 25	75
many other sections; an early round variety, with very small neck; ripens early, and very uniformly; yields large crops, and keeps well		75

ONION SETS Market Variable

Plant as early in spring as convenient to obtain early green onions; but they may be set any time up to June 1. Set in rows a foot apart, and 3 or 4 inches between them in the row. Any good soil will suit them. When grown in quantity, high cultivation is given in order to forward the crop for an early market. They are ready for use as soon as the bulbs begin to be of fair size; those not used in a green condition will ripen early in July, and make nice Onions. Potato Onions and Top Onions are grown from bulbs only, growing in clusters, which are separated when planted.

	Q.	1	rk.
Egyptian, or Perennial Tree Onions. These are perfectly hardy. Being once pla be productive year after year. The old bulbs divide, making several irregular Oni	ons. The young sets		
are produced on the top of the stalks and are set out in the fall		25 \$1	25

Shallots. Somewhat resembling the last named sort, but smaller; much used in sou	ups. stews. salads. etc.:		
very mild flavor		25 1	25
White Potato, or Multiplier. These are of a pure silvery white color; very produc ity and size for bunching green. Their keeping qualities are remarkable, being ke a year. They are extremely early, being ready for market from three to four weekind	ept perfectly sound for		
kind		25 1	25
White Sets. The best for general use; mild flavor		30 2	00
Yellow Sets. Not as mild in flavor as the white variety, otherwise as good		25 1	50

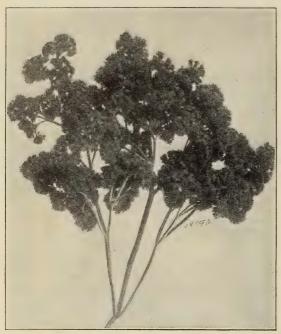

YELLOW GLOBE DANVERS

OKRA, or GUMBO (Effbarrer)

One ounce will sow 40 feet of drill

Sow in May in drills, about 2 feet apart and 2 inches deep. Thin the plants to 10 or 15 inches apart. It is of the easiest culture. Ordinary soil and manuring only are required. The young pods are used in soups and stews; a plant very generally grown in the South.

CHAMPION MOSS CURLED PARSLEY

Dwarf Green. More productive than the other sort, and better suited to northern cultivation. Pkt. 5 cts., oz. 10 cts., 4/lb. 30 cts.

cts., ¼1b. 30 cts.

White Velvet, or Creole. Pods smooth, of large size, and a creamy white color. A favorite in the South. Pkt. 5 cts., oz. 15 cts., ¼1b. 30 cts.

PARSLEY (Beterfilie)

One ounce will sow 150 feet of drill

Parsley seed germinates very slowly, taking two to four weeks to come up; hence, if wanted early, no time should be lost by delaying the sowing. Make the rows 12 to 14 inches apart. Thin to 3 or 4 inches apart, or transplant at this distance. Can be sown in hotbeds in February, or later in open ground. Late in autumn place frames over some of the plants to lengthen out the season of cutting. For garnishing purposes nothing equals Parsley; it is also used in salads, soups, etc. Any good soil will suit for growing this plant.

Champion Moss Curled. A most elegantly curled variety; rather dwarf, and of the richest green; very ornamental. Pkt. 5 cts., oz. 10 cts., ½1b. 30 cts.

Double Curled. A fine variety, well curled. Pkt. 5 cts., oz. 10 cts., ½1b. 30 cts.

Hamburg, or Rooted. A rooted variety, of which the roots are the portion used; good in flavoring soups and stews. Pkt. 5 cts., oz. 10 cts.; ½lb. 30 cts.

New Fern-Leaved. Exquisite in form, and admirably

New Fern-Leaved. Exquisite in form, and admirably suited for mixing with dwarf ornamental foliage plants in the flower garden, also for table decorations. Pkt. 5 cts., oz. 10 cts., ½1b. 30 cts.

Plain-Leaved. Much used in soups, etc.; rather stronger in flavor than the other sorts. Pkt. 5 cts., oz. 10 cts., 41b. 30 cts.

PARSNIP (Baftinafe)

One ounce will sow 100 feet of drill. Five to six pounds to the acre

Sow in April, or early in May, as Parsnips require a long season to mature. Their cultivation is otherwise the same as directed for carrots. They may be dug in the autumn, and stored for winter use; but if left in the ground till the following spring, they are very much improved in flavor. Sow a liberal quantity of seed, as from its nature it does not always come up well.

always come up well.	kt.	Oz.	1/1b.

PUMPKIN (Bürbiß)

One ounce will plant 20 hills

Pumpkins are grown chiefly as food for stock. The usual method of planting is to scatter a few seeds at intervals in the hills when planting Indian corn; in this way good crops of Pumpkins are secured with slight labor and expense, and make a valuable addition to the season's crops.

Connecticut Field. The common yellow Pumpkin, grown chiefly for feeding stock	.\$0 05	\$0 10	\$0 15	\$0 30
Nantucket, or Negro. Small, dark warted shell. Best for pies			30	60

Mammoth Tours. Grows to a very large size. Not valuable for cooking but, on account its size, one of the most economical to grow		20	60	2 00

PEAS (Crbfen)

One quart will plant 100 feet of drill. One to one and a quarter bushels per acre.

If by mail, add 15 cts. per quart to cover postage

The cultivation of Peas requires only ordinary attention; the dwarf varieties require a rich soil and liberal manuring: the other sorts need only ordinary cultivation. Peas are very hardy and succeed best under low temperature. The

early, round smooth varieties should be sown as early as possible in spring, while the more tender, wrinkled sorts will do better if planted after the ground has become warmer. Sow in drills 2 to 3 feet apart according to the variety, and cover early sowings about 2 inches-late sowings should be covered 3 to 4 inches. A pint will plant about 50 feet of row. Make the drills deep enough to allow room for the manure, which is usually scattered along the bottom of the drill. It is safer not to have the seed in direct contact with the manure; to avoid this draw in a little earth before sowing the Peas. It is better to use well-rotted compost than fresh stable manure. Successive plantings may be made up to the middle of May; if planted later in this latitude, they suffer from the heat and become mildewed. Some of the dwarf sorts yield good crops if sown about the middle of August. taller sorts should be supported with strong brush, firmly pianted along the drill, before the Peas make much vine; in field culture this is usually omitted, however. There is much confusion as to the varieties of Peas, many sorts in the same catalogue being identical except as to name.

EXTRA-EARLY VARIETIES

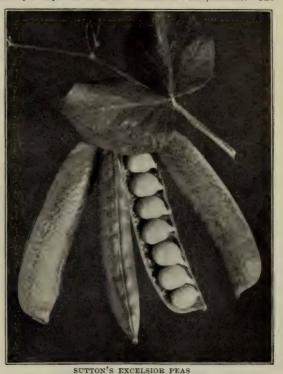

Alaska (Earliest of All, or Clipper). A superior blueseeded variety; very early, productive and of excellent quality. Extensively grown for early market. Pt. 15 ets., qt. 25 ets., pk. \$1.50.

American Wonder, Bliss'. One of the earliest and best dwarf, wrinkled Peas known. Vine vigorous and branching, growing about 9 inches high, well filled with pods containing six to eight large, sweet Peas. Requires good, rich soil. Pt. 15c., qt. 30c., pk. \$2.

British Wonder. Similar to American Wonder, but of more vigorous growth. Pt. 20c., qt. 40c., pk. \$2.25. Daniel O'Rourke, Improved. Very early and yields well; pods of medium size. Pt. 15c., qt. 25c., pk. \$1.25.

Duke of York. A variety with immense pods, and one of the best of the extra-early wrinkled sorts. Pods long, well filled, and Peas of superior quality. Pt. 15 cts., qt. 30 cts., pk. \$1.75.

earliest. Quality good. Vine about 18 inches

POTATOES (Rartoffel)

Eight bushels of cut tubers are sufficient to plant one acre

Special quotations on large lots. Prices subject to variations of the market

Any good soil will produce Potatoes. When grown upon a good sandy loam, however, their quality is usually much better than that of those produced upon heavy soils. Make furrows of good depth, 3 feet apart; scatter a liberal dress-

ing of fertilizer along the drill, and upon this set the seedpotatoes, about 8 or 10 inches apart. One or two pieces of Potatoes, containing one or more eyes in each piece, are put in each hill. Cover a couple of inches, and, when the sprouts appear, cultivate and hoe to keep the soil free and clear of weeds. As the vines increase, draw earth around them, forming a slight ridge.

Beauty of Hebron. A general favorite. Pure white with flesh-colored skin. Pk. 50 cts., bus. \$1.50, bbl. \$4.

Bovee. Early and productive. Fine quality; flesh white and dry. Pk. 50 cts., bus. \$1.50, bbl. \$4.

We can furnish other sorts not listed above, if desired

RHUBARB (Rhabarber)

This plant is mostly propagated by division of the roots. The best time to set out the plants is early in the spring, although it is sometimes done in autumn. Make furrows of good depth, 3 to 4 feet apart, according to the variety planted; across these furrows, at right angles, make others the same distance apart; at each intersection put three or four shovelfuls of good manure, and upon this set the plants. Any good soil will suit Rhubarb; but to obtain heavy crops, good soil well manured is indispensable. A piece of root with a single bud, or eye, is enough for each hill. Cultivate during summer, but do not pull any stalks the first year. Late in autumn cover each plant with a good shovelful of manure, and plough a furrow against each side of the rows; this protection will assist the earliness of the crop. In early spring level the ground, working in the manure with a fork. Plants can be obtained from seed, which may be sown in a hotbed in March, and the plants set out about the middle of May. It takes longer, however, to obtain a crop from seedling plants than from roots.

Schlegel & Fottler Co. Newbu.

Gentlemen:—I will say just a word in favor of your Franklin Park Lawn Seed. I have used it for the grounds of the late Hon-John Hay for the past three years and it has proven satisfactory in every way. I have given it a test that very likely no other person has; I have sown it broadcast over old grass ground that had not been fertilized nor had anything done to it for thirty years. I sowed it, as I said, broadcast, and then I used the phosphate which you sent to us, raking it in well, and today not one gardener in a thousand would know but what that piece of grass ground had been plowed and brought to a high state of cultivation before sowing the seed. So much for Schlegel & Fottler Co.'s Franklin Park Lawn Seed.

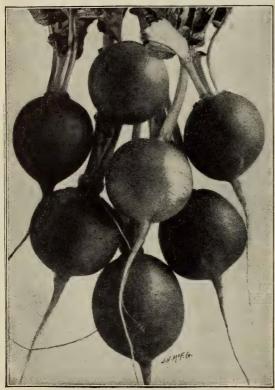

Respectfully,

W. J. GROUT, Gardener to the late Hon. John Hay.

RADISH (Rabies und Rettia)

One ounce will sow 100 feet of drill

Radishes should be grown on light, sandy loam, and, to be crisp and tender, they should make a rapid growth. If the soil is moderately rich, very little, if any, fertilizer is necessary. For very early use, begin sowing in frames in January, and continue successive sowings every two weeks. Early in May the seed may be sown in open ground; but for such early sowing a warm, well sheltered situation should be selected; later sowings may follow every two or three weeks throughout the summer, using the varieties best adapted to the different stages of the season. Sow broadcast in narrow beds or in drills. Many Radishes are grown to good advantage drilled in with other crops. For winter Radishes, sow the seed about midsummer, and keep the roots during winter in a cool cellar, covered with earth, or in well-covered pits out-of-doors. Winter Radishes should be placed in cold water an hour or so before using.

EARLY SCARLET GLOBE RADISHES

- Beckert's Chartier. Large size; clear rose-color with white tips; grows fast; crisp and tender. Pkt. 5 cts., oz. 10 cts., 1/4 lb. 20 cts.
- Crimson Giant Forcing. Grows to a large size without becoming pithy. Excellent for forcing. Pkt. 5 cts., oz. 10 cts., ¼lb. 30 cts.
 - Early French Breakfast. Similar to the Early Scarlet olive shaped variety in form; color a handsome scarlet, with a white tip. Pkt. 5 cts., oz. 10 cts., ¼1b. 25c.
- Early Long Scarlet. Short top. The standard variety of the long sorts, used either for forcing or open culture; 6 or 7 inches long. Pkt. 5 cts., oz. 10 cts., 1/4lb. 25 cts.
- VEarly Scarlet Globe. An excellent forcing variety; brilliant scarlet; fine globe-shaped, with small top. Very crisp and tender. Pkt. 5 cts., oz. 10 cts., ½lb. 30c.
- Early Scarlet Olive-shaped. One of the early sorts; much used for forcing, and suitable for early sowing in open air. Pkt. 5 cts., oz. 10 cts., ¼lb. 25 cts.
- Early Scarlet Turnip-rooted. Very early and of excellent quality. Pkt. 5 cts., oz. 10 cts., 10 cts.
- Early Scarlet Turnip-rooted, White-tipped. Similar to the last named sort, except the white tip of the root; a handsome Radish. Pkt. 5 cts., oz. 10 cts., ½1b. 25c.
- VEarly White Turnip rooted. Round; clear white. Pkt. 5 cts., oz. 10 cts., 1/4 lb. 20 cts.
- Vicicle. Quick-growing; clear white. Fine for forcing. Pkt. 5 cts., oz. 10 cts., 4lb. 25 cts.
- Long Black Winter. One of the hardiest and best for winter use. Pkt. 5 cts., oz. 10 cts., 1/4 lb. 25 cts.
- Long Brightest Scarlet, White tipped. Brilliant scarlet, tipped with white; very early. Pkt. 5 cts., oz. 10 cts., ¼lb. 30 cts.
- Rosy Gem. A rose-colored, white-tipped turnip variety. Pkt. 5 ets., oz. 10 ets., 1/4lb. 25 ets.
- Round Black Winter. Similar to Long Black Winter, except in shape. Pkt. 5 cts., oz. 10 cts., ¼lb. 25 cts.
 - Scarlet Twenty-day Forcing. Short-leaved; very early; brilliant red; particulary fine for use in frames.

Pkt. 5 cts., oz. 10 cts., 1/4 lb. 25 cts. Pkt. Oz. White Giant Stuttgart. Very early and grows to a large size. Fine quality, firm and brittle....\$0 05 \$0 10

25 10 25

In addition to the above, we offer the following well-known sorts at uniform price of: pkt. 5 ts., oz. 10 cts., 2/1b. 20 cts. Gray Summer Turnip, Long White Naples Summer, Long White Winter, Chinese Rose Winter.

SALSIFY (Haferwurgel)

One ounce will sow 50 feet of drill

A most delicious vegetable. It is used stewed, boiled or fried and sometimes as a salad, sliced raw in vinegar, with salt and pepper. When cooked it has an oyster flavor. It is commonly called vegetable oyster. The cultivation is precisely the same as directed for parsnips; and it will keep over winter, in the ground where grown, in the same way as parsnips.

Mammoth Sandwich Island. This variety will average nearly double the size of the White French, 60

SPINACH (Spinat)

One ounce will sow 50 feet of drill. Twelve to sixteen pounds will sow an acre

Spinach may be grown on any ordinary soil, and its cultivation is a very simple matter. It is grown both as a spring and summer crop. For early use, sow in August or September, in drills 12 to 14 inches apart. At the approach of cold weather cover lightly with straw, or any handy litter. Uncover when the plants begin to make a new growth in spring. For summer use sow early in spring, in same way as above, using rather less seed. If the plants stand too thick, thin to 3 or 4 inches apart. A liberal dressing of good manure should be used. The land can hardly be made too rich.

Arlington Pointed-Leaf. A hardy variety, used for fall sowing, for early spring use\$0 05 \$0 10 \$0 20 15 New Zealand (Tetragonia expansa). A plant of a different genus, but of similar character and uses 15 30 10 15 VSavoy-leaved Bloomsdale. Leaves wrinkled or curied; makes a handsome appearance....... 05 10 15 10 15

SQUASH (Speise Rurbis)

One ounce of the small-seeded varieties will plant 40 hills; of the large-seeded, 15 hills.

Squashes, being very tender, should not be planted too early; and as they make a very rapid growth, they will have ample time to mature if planted after the weather has become settled and warm. A warm, mellow soil suits them best; and they require a liberal amount of manure, which is best applied directly to the hills. Plant in May, after all danger of frost is past. The summer varieties should be planted in hills, 3 to 4 feet apart each way, and the later sorts about twice this distance; put 8 or 10 seeds in each hill, as there is much danger of loss from bugs. Protect against these as directed for cucumber culture. When well grown, thin to three or four plants to each hill.

Bay State. Shape of Essex Hybrid; shell very hard; color blue; very heavy and solid\$0 05	Oz. \$0 10	1/4lb. \$0 30
Boston Marrow. Early fall sort; rich orange color, good size, excellent flavor, keeps well 05	10	25

Prolific, or Orange Marrow. Much earlier and more prolific than any other Marrow Squash 05	10	25
Warren. This variety resembles the Turban in shape; the shell, however, is rough and warty, and		
much thicker and harder than that variety	15	40
Vegetable Marrow. A favorite English sort; flesh white and of rich flavor	10	30
Victor. Orange color, with thick, warted shell. Flesh thick and quality good	10	30

SEA KALE (Meerfohl)

The young shoots, when blanched and boiled, have a flavor somewhat like asparagus. Sow the seed early in spring, in hills about 2 by 3 feet. Thin to three or four plants in each hill, and cultivate during summer. Protect during the succeeding winter with about 6 inches of manure or leaves upon each hill. Early in spring remove the covering, and, when the young shoots appear, earth up to blanch, or cover with flower-pots, etc., for same purpose. A strong soil is suitable.

Silver Sea Kale. Pkt. 5 cts., oz. 30 cts., 1/4lb. \$1.

TOMATO Liebes-Apfel

One ounce will produce about 2,000 plants

Of Tomatoes the varieties are numerous, some of them being very distinctive. However, there are many sorts of the large red varieties annually introduced and represented as being superior to all others, which, as a rule, do not show variation enough to be classed as distinct varieties. The seed may be sown in hotbeds, with good bottom heat, in February or March; and, when the plants are 2 or 3 inches high, transplant into other frames about 4 or 5 inches apart each way, or in boxes or single pots which are to remain in the frames. Set the plants out in open ground, not earlier than the last week in May or first week in June. Being very tender, they will not bear the least frost. Choose a light, sandy, or gravelly loam, in a well-sheltered situation, and with a southern exposure if possible, as early fruit is desirable. In such a location the plants may be set about 4 feet apart each way, using a large shovelful of well-rotted manure in each hill. On rich soils but little, if any, manure is necessary; and the plants will need to stand about 6 feet apart each way.

Tomato Plants. Ready in June. Belmont, Red Cross, Dwarf Champion, Perfection. Per doz. 30 cts.			

SCHLEGEL & FOTTLER Co.,

MANCHESTER, MASS., October 29, 1906.

Gentlemen:—I wish to inform you that everything procured from your house has given my employer and myself entire satisfaction.

Would make especial mention of your bulbs.

Yours very truly,

(Signed) WM. IRWIN,

Gardener to Mrs. Gordon Abbott.

StF

TURNIP (Rübe)

me ownce will som 150 feet of drill

A light soil is the best upon which to grown Turnips; and, if it has been well manured the previous year, no further supply is required. A dressing of some good commercial fertilizer may be applied to advantage; but fresh stable manure should not be used, or the crop will be more or less worm-eaten, and rank in flavor. The flat or English varieties

are extensively used as a late crop, and may be made to follow almost any other early crop. Fall Turnips may be sown from July 1 till about September 10, or, in favorable seasons, even later. These varieties are also used for early crops, the seed being sown in April. But few soils or locations will produce early Turnips of good quality. Old pasture land recently broken up, and dressed with bone-dust, phosphate of lime, guano, etc., will often produce satisfactory crops; but at best, success is the exception rather than the rule in growing early Turnips. Sow the seed broadcast upon an even surface, using about three-quarters of a pound of seed per acre, and rake it in evenly. The Swedish, or ruta-baga varieties, should be sown in drills 15 to 18 inches apart, at any time from June 1 to the middle of

July, using about one pound of seed		
per acre. The plants should be thinned to about 8 or 10 inches	第四条约	Alter Control
apart. White egg turnips		
Pkt	Oz.	1/4lb.
Early Purple-top Milan. The earliest of the flat Turnips; white, with purple top; small strap leaves; sweet, and of excellent quality	\$0 10	\$0 20
Early White Milan. Similar to Purple-top Milan, but pure white		20
Long White, or Cow-horn. A rapid-growing late variety, of a long or carrot shape; in some sec-	10	
tions much cultivated for feeding to stock	5 10	20
Purple-top Flat, Strap-leaf. The best of the flat or English Turnips; used for early or late crops. 0	5 10	20
Aurple-top White Globe. A quick-growing, fine-grained variety	5 10	20
white Egg. A very handsome variety for fall crop; keeps well through the winter; skin very smooth; pure white; grows large; oval-shaped; one of the best table Turnips	5 10	20
White-top Flat, Strap-leaf. Very similar in form and quality to Purple-top	10	20
Yellow Aberdeen. An old, well-known sort; rather more flat than Yellow-stone		20
Yellow-stone, or Globe. Of medium size, with yellow flesh; keeps well	5 10	20
RUTABAGA, or SWEDISH TURNIPS		
Budlong Swede. A choice strain of the white Rutabaga, made by selection. Said to be earlier than others and more nearly round in form; sweet, of excellent flavor and keeps well		20
Carter's Imperial Swede. Flesh a light creamy yellow; very smooth and solid; yields immense crops	10	20
\ Improved American Purple-top Swede. Fine quality. Excellent for table or for stock 0		20
Laing's Early Swede. One of the earliest of the yellow Swedes; globe-shaped		20
London Extra Swede. A standard variety; oval-shaped; short neck; free from roots	5 10	20
Shamrock Swede. A popular variety: rather more globe-shaped than the London: fine-grained:		
yellow-fleshed, short neck		20
St. Andrew's Swede. A yellow-fleshed winter variety, of excellent quality; keeps well 0	5 10	20
Sweet German. Rather more globe-shaped than White French, and has a coarser appearance;	10	20
white-fleshed, and most excellent in flavor.	5 10 5 10	20
White French. Oval in form; clear white flesh; one of the best winter Turnips	10	20
TOBACCO

Connecticut Seed-leaf. The variety extensively grown in the northern and middle states; largely		
used as cigar wrappers\$0 10		\$1 00
Havana, Imported seed	30	1 00

Mr. E. Stanley Brown, owner and director of "The American Gardening" trial grounds writes of our Early Golden Sweet Corn, "The par excellence of goodness. Your statement or description in catalogue is as near accuracy as possible."—Dec. 13, 1904.

SWEET, POT AND MEDICINAL HERBS

The cultivation of herbs is very simple, and but little care is needed beyond keeping down the weeds. Sow in April or May, in drills 12 to 15 inches apart, and thin out the young plants where they stand too thick. Gather when just coming into bloom, tie in small bunches and dry in the shade.

ESCULENT ROOTS AND PLANTS

Asparagus Roots. Conover's Colossal and Palmetto. Strong 2-year-old plants, each, 75 cts. per 100, \$6 per 1,000; if by mail, add 40 cts. per 100 for postage.

Chives. Per bunch 15 cts., by mail 10 cts. additional; per doz., \$1.25, buyer paying transit.

Horse-radish Roots, or Cuttings. Per doz., by mail, 15 cts.; by express, per 100, 75 cts., per 1,000, \$5.

Jerusalem Artichokes. Per qt. 20 cts., by mail 10 cts. per qt. additional; per peck, by express, \$1.

Rhubarb Roots. Each, 20 cts.; per doz., \$2, buyer paying transit.

Mint. Per box, 50 cts., buyer paying transit.

Tarragon Plants (Estragon). We offer strong, well-grown plants of this valuable aromatic plant at, each, 25 cts.; doz., \$2.75, buyer paying transit.

Farm and Miscellaneous Seeds

The same care that we use in the selection of our vegetable seeds is used in the selection of our farm seeds, and we believe them to be true to their names, and as pure as can be obtained. We do not list a large variety, but confine ourselves to a few, such as we consider the best sorts. We can, however, furnish many others as advertised. We are always pleased to send samples of our farm seeds, and will give special prices when large lots are wanted.

FIELD CORN

If ordered by mail, add 15 cts. per quart to cover cost of postage. Prices subject to change with the market

Q	t. T	Bus.
Blount's Mammoth Ensilage. A tall-growing, late variety, with numerous leaves	15 \$1	1 75
Canada Early Yellow. A very early, eight-rowed variety; bears close planting and yields numerous ears, which fill out to the extreme tip; a safe sort for high latitudes or for late planting	15 1	1 75
Cocke's Prolific. A southern variety of great value for ensilage	1	1 50
Leaming. This variety, introduced some years ago, has been much improved, and is now claimed to be nearly as early as the Canada, and more productive. It is a dented flint variety, and makes the best meal. The ears are large, with deep, large grain, of dark orange color, and small red cob; stalks of medium size	15	1 50
Longfellow. An excellent yellow variety for a main crop; ears long, sometimes 12 to 15 inches; large ker-	10	. 00
nel and small cob; a sort safe to plant in this latitude; yields immense crops.	15	1 75
Mastodon. A large early dent variety.	15	1 50
Pride of the North. An early yellow dent variety, especially adapted for this latitude. Height 9 to 12 feet; ears, which are set 3 to 4 feet from the ground, average 8 to 10 inches in length; stalks are very leafy. Highly recommended.	15	2 00
Red Cob Ensilage. A very rank, tall-growing variety. Excellent for ensilage. Yields enormous crops	15	1 50
Sweet Corn for Fodder Our fodder Sweet Corn is grown expressly for sawing for fodder and is a very		

clean, bright lot. This is very valuable for milch cows, being sweeter and more nutritious than flint varieties. Pk. 60 cts., bus. \$2.25.

Sanford Early. Very prolific; large stalks with plenty of leaves, and handsome ears 12 inches long; kernels plump, nearly white in color, which make the best of meal. Qt. 15 cts., bus. \$2.

Southern Fodder. This variety grows from 12 to 16 feet high, and produces a rich, luxuriant growth. Qt. 10 cts., pk. 40 cts., bus. \$1.35.

SEED GRAIN

Add 8 cts. per pound if wanted by mail. Prices subject to change with the market

Wheat, Spring Saskatchewan Fife. An amber variety, unequaled for earliness, yield and vigor. Bus. \$2.25.

Wheat, Winter, White. Bus. \$2.25.

Rye, Spring. Extra selected. Bus. \$1.50.

Rye, Winter. Extra selected. Bus. \$1.25.

Barley, Two-rowed. Clean and free from oats. Bus. \$1.30.

Oats, American White. Selected, heavy. Bus. 75 cts. to \$1.

Oats, Golden Sheaf. A variety greatly improved by selection, yielding large crops of heavy, plump Oats. It is also very early. The straw is remarkably stiff and strong, therefore not likely to lodge. \$1.25.

Buckwheat, Japanese. A very prolific variety, and also makes the best flour. Sown at same time as Silverhull, it ripens a week earlier. A much stronger grower than the common sort, with kernels nearly twice as large. Bus. \$1.40.

Buckwheat. Common variety; clean seed. Bus. \$1.25.

Buckwheat. Silver-hull. Early and yields well. Large plump silvery-gray kernels. The plant continues to bloom longer than the common Buckwheat, thus producing larger crops. Makes fine white flour. Bus. \$1.25.

GOLDEN SHEAF OATS

MISCELLANEOUS SEEDS

	Add 8 cts. per pound if wanted by mail. Prices subject to change with the market		
E	EANS, Velvet. Used in the South as a forage plant, and for turning under as a fertilizer. The	. Bus	
	vines are relished by stock, and the Beans are useful for feed when ground and mixed with oats, or		
	when used alone. Plant thinly in rows 4 feet apart		
p	Soja. A valuable fodder crop, either fed green or as ensilage	0 3 50	,
_	pigeons, etc	0 1 75	5
	Cow. Adapted to southern localities; also valuable in this latitude as a fodder plant, sheep being very		
	fond of them when in flower; their chief value, however, is as a green crop to plow under. $1\frac{1}{2}$ bushels		
	to the acre.		
	New Era. Said to be the best variety, whether for northern, western or southern planting. They mature early, are upright in growth and enormously productive. The seed being small, only half the usual quan-		
	tity is needed per acrepk. 75 cts	2 50)
	Clay. A favorite variety. Prolific in yield of peas and vinepk. 60 cts	2 25	5
	Black. Very prolific, and earlier than other sorts. Valuable as a forage croppk. 60 cts	2 28	
	Whippoorwill. Early, and a favorite in the North and West	2 25	
В	ROOM CORN. Improved dwarf. Fine straight brush	100 lbs. \$12 00	
	UGAR CANE, Early Amber. One of the best green fodder plants		
	LAX SEED. Clean seed		
	UNFLOWER, Mammoth Russian. Largely used for feeding to poultry		
K	AFFIR CORN. White. Valuable for fodder. The seed makes good food for pigeons	4 00)
R	APE, Dwarf Essex, English. Excellent for sheep pasture, also for soiling. Can be used for pastur-		
	age in three months after sowing. Sow 5 lbs. per acre broadcast	8 00)
V	ETCHES, or TARES, Spring (Vicia sativa). A pea-like plant grown extensively in England and to a.		
	considerable extent in Canada for stock feeding. Culture same as field peas. Sow two bushels per acre. 08	6 00)
	Sand, Winter, or Hairy (Vicia villosa). A very hardy forage plant, growing well on soils so poor and sandy that they will produce but little clover. The plants, when mature are about 40 inches high, and if		
	cut for forage as soon as full grown and before setting seed, they will start up again and furnish even a		
	larger crop than the first. Sow at the rate of 1½ bushels to the acre	12 00)
W	TLD RICE (Zizania aquatica). An annual which sows itself about the middle of September, lies dor-		
	mant all winter, in spring commences to sprout as soon as water gets warm. It grows very rapidly in 1		
	to 3 feet of water; ripens late in August or early in September. It should be sown broadcast from a boat,		
	in 1 or 2 feet of water and where there is a mud bottom. It succeeds best when planted in the fall, and if this cannot be done, the seed should be kept moist by being packed in moss or damp excelsior until ready		
	to sow. As an attraction for wild fowl it cannot be equaled. In large ponds and lakes it purifies the water,		
	affords a refuge for the small fry from the large fish, as well as furnishing them plenty of food from the		
	animalculæ upon its stalks; for planting in fish-ponds it is especially desirable. It also does well along	35.00	
	the shores of marshes, and makes a good hay	15 00	
	CLOVER SEEDS		
	Add 8 cts. per pound if wanted by mail. Prices subject to change with the market		
	ed Northern, or Mammoth. Grows 4 to 5 feet high, and is used by some to plow under for manure 17	16 00	
	ed Medium (Trifolium pratense). This is the common red Clover in general use	15 00	
**	mixtures, and is also valuable when mixed with grass seeds for pastures	23 00	
A	sike, or Swedish (Trifolium hybridum). Very valuable both for cutting for hay and for pasturage.		
	Grows about 3 feet high, is very productive and fragrant. Flowers light pink, or pink and white. Root		
A	perennial and hardy	17 00	
A	Ifalfa, or Lucerne (Medicago sativa). Very valuable in light, good soil, especially in the South, where three or four cuttings can be made annually. Grows 2 to 3 feet high and has purple flowers	18 00	
A	Ifalfa, Turkestan. Said to be hardier and more productive than the ordinary variety	20 00	
	rimson (Trifolium incarnatum). This makes a valuable crop for grazing, and is also good for plowing		
	under as a green manure in sections of the country where it proves hardy. It is not to be recommended	16.01	
	for the New England states	10 00	

LAWNS

To insure a really fine lawn, there are several requisites; a good depth of rich soil, properly drained; a liberal dressing of some good fertilizer; nicety of grading in the levels and slopes; a firm, smooth surface upon which to sow the seed; and a sufficient quantity of the very best lawn grass seed, suited to the situation. The latter item is of prime importance. A rich soil of good depth, and liberally fertilized, will maintain a fine greensward permanently, needing only an occasional top-dressing. Make a smooth surface with harrow and rake, and use a roller to make it firm and even, before sowing the seed. After sowing, cover the seed well by raking it in, and again use the roller to finish the work. Use four bushels, or even more, of our finest English Mixture, or sixty-four pounds of our Franklin Park Mixture per acre. In this latitude there is no more favorable season for sowing than the last of August or the first of September. Sown at this time, the grass will be strong enough to winter over safely. If the seeding cannot be delayed until autumn, it should be done as early in the spring as possible, so that the young grass may be strong enough to withstand the heat of midsummer.

Franklin Park Lawn Seed Trade Mark Registered

Superior Mixture for Lawns, Terraces, Croquet Crounds, etc.

The mixture of grass seeds we sell under this name is made from the identical formula used by the Park Commissioners of the city of Boston in their work of laying out the beautiful lawns and terraces, which add such a charm to our new parks. For many years the grass seed used on these parks has been supplied by us, which fact should be a strong guarantee of quality. The Franklin Park Mixture gives a fine, smooth, velvet sward within a very few weeks after sowing. Weight, per bushel, 32 pounds. The very large demand for this lawn seed has necessitated our having the name "Franklin Park" registered as a trade mark, in order to protect ourselves from imitators. Lb. 30 cts.; 16 lbs., sufficient for ¼acre, \$4; 32 lbs., sufficient for ½acre, \$7.50; 64 lbs., sufficient for 1 acre, \$15.

FINEST ENGLISH LAWN MIXTURE. This mixture, made from our own formula, we have sold for years, and it has given very general satisfaction. Weight, per bus. 16 lbs. ½lb. (1 qt.) 20c., lb. (2 qts.) 35c., bus. (16 lbs.) \$4. SEEDS FOR GOLF LINKS. We have furnished for several years past many of the largest and most prominent

golf clubs in New England with grass seeds, and the results have been most satisfactory,

FAIR GREEN MIXTURE. Specially prepared from such varieties as will prove most permanent and useful. Bus. (30 lbs.) \$4.

PUTTING GREEN MIXTURE. A combination of grasses designed to produce a dense, close sward. Qt. 25 cts., pk. \$1.75, bus. (20 lbs.) \$5.

SEEDS FOR SHADED LAWNS. Fine grasses, specially selected for locations partially shaded by buildings or trees. Qt. 30 cts., pk. \$1.75, bus. (24 lbs.) \$6.

Add 8 cents per pound to prices of all grasses if wanted by mail

Replying to your favor, I beg to advise you that samples of Kentucky Blue Grass Seed were received from you, and all were found to be free from adulterants.—(Signed) W. M. HAYS, Acting Secretary, Department of Agriculture, Washington, D. C., Feb. 26, 1906.

CHOICE GRASS SEEDS

For Lawn and Farm

The Grass Seeds, Clover Seeds, etc., which we offer are of the highest grades only. In addition to the various mixtures offered by us, we make special mixtures for lawns, tennis courts, pastures and mowing lands, and will give quotations on application.

Add 8 cts. per pound to these prices if wanted by mail. Prices subject to the variations of the market.

Awnless Brome Grass (Bromus Inermis). Recommended for dry, arid soils, where other grasses cannot be grown. Grows rapidly and produces abundantly. Lb. 25 ets., 100 lbs. \$18.

Beach Grass (Ammophila Arundinacea). Excellent for sowing on railway banks, seashore, etc. Its strong, creep-

ing roots bind the drifting sands, and protect against action of wind and wave. Lb. 45 cts., 100 lbs. \$40.

CREEPING BENT

- Crested Dog's-Tail (Cynosurus cristatus). An extremely hardy grass, sometimes used in mixtures for sowing pasture land. When mature, the stems are rather too hard and wiry to be relished by cattle; it is more especially adapted to use in sheep pastures. (28 pounds per bushel.) Lb. 40 cts., 100 lbs. \$35.
- Fowl Meadow (Poa serotina). A valuable grass for wet meadows, where it will produce large crops of excellent hay after it has become well established. Sow two bushels per acre. (10 pounds per bushel.) Lb. 25 cts., 100 lbs. \$20.
- Hard Fescue (Festuca duriuscula). Not quite so common as the Sheep's Fescue, but much like it in appearance and habit; grows rather coarser; valuable for dry soils. (14 pounds per bushel.) Lb. 25 cts., 100 lbs. \$20.
- Italian Rye-Grass (Lolium Italicum). One of the imported species, highly esteemed in England, where it is much used for soiling. It is valuable for mixing in with other grasses for permanent pastures, where its earliness recommends it. (18 pounds per bushel.) Lb. 12 cts., 100 lbs. \$9.
- Creeping Bent (Agrostis Stolonifera). A variety of English Bent. Valuable in mixture with other grasses for lawns, etc. Suitable also for moist localities. Lb. 25 ets., 100 lbs. \$20,
- Kentucky Blue (Poa pratensis). "June grass." For pastures and lawns it has no superior, giving that peculiar rich shade of bluish green so much admired in the best lawns; also making a very close, velvety turf. It is usually sown mixed with other fine grasses. (14 pounds per bushel.) Fancy clean seed. Lb. 20 cts., 100 lbs. \$18.
- Lime Grass (Elymus Arenarius). Useful for sowing on seashore, railway banks, etc. Its wide spreading, thickly matted roots prevent drifting of sands. Lb. 60c., 100 lbs. \$50.
- Meadow Fescue (Festuca pratensis). Several of the Fescue grasses are valuable for moist soils, particularly so for permanent grass land or pastures; while others of the genus succeed best in very dry or even sterile soils. Meadow Fescue is one of the principal grasses found in moist portions of old pastures and grass fields. The seed ripens early and sheds readily; and,

where this species becomes well established, it remains many years. It is much relished by live-stock, and makes excellent hay. (15 pounds per bushel.) Lb. 15 cts., 100 lbs. \$12.

- Meadow Foxtail (Alopecurus pratensis). The only species in list of Foxtail grasses that is worthy of attention. It is not particularly valuable as a hay crop, being light and very bulky; as a pasture grass, it withstands heat and drought well. It is also an early grass, and grows rapidly. The seed is difficult to obtain, and is consequently rather high in price. (8 pounds per bushel.) Lb. 40c., 100 lbs. \$35.
- Orchard (Dactylis glomerata). One of the very best grasses in cultivation. If cut just as it is coming into bloom (as it always should be), a good second crop will follow, and sometimes even a third. It is recommended for sowing with red clover, as they come into flower at the same time. Orchard is one of the earliest grasses, yields immense crops, and makes the best of hay; it endures considerable shade, and is much used for sowing in orchards. Two or three bushels of seed will sow an acre. (14 pounds per bushel.) Lb. 18 cts., 100 lbs. \$15.
- Pacey's Perennial Rye-Grass (Lolium Perenne). A rapid-growing, early grass; much used for sowing with other grasses in meadows, pastures and mowing lands. As it starts early, it soon shades the ground, affording shelter to the more delicate sorts. Should be cut as soon as it is in blossom. Makes excellent hay. Sow two bushels per acre, if used alone. (24 pounds per bushel.) Lb. 15 cts., 100 lbs. \$10.
- Perennial Rye-Grass, Selected Dwarf. A short seeded variety dwarf, and useful for lawns, golf links, etc. Lb. 15 cts., 100 lbs. \$12.
- Red Top (Agrostis vulgaris). A very valuable, permanent grass; scarcely of less importance than Timothy; grows well upon almost any soil, but will pay well for high cultivation; especially valuable for meadows, pastures and lawns, where permanent grasses are desirable. (12 pounds per bushel.) Price variable. Lb. 10 cts., 100 lbs. \$8.

MEADOW FESCUE

CHOICE GRASS SEEDS, continued

Red Top. Clean seed, free from chaff, weighs about 36 pounds to the bushel. Lb. 18 cts., 100 lbs. \$15.

Red, or Creeping Fescue (Festuca rubra). A creeping, rooted species forming a close turf. Suitable for sandy soils and seashore. Thrives in inferior soils. Lb. 25 ets., 100 lbs. \$22.

Reed Canary Grass (Phalaris arundinacea). Hardy perennial and prefers strong wet soil. The roots strong and creeping, therefore valuable for binding banks or valuable for stock if cut when young. Lb. 60 cts.

Rhode Island Bent (Agrostis canina). A fine and very permanent grass, chiefly used for pastures or lawns, for which it is one of the best. It has been claimed that this species and A. vulgaris are identical; the species are distinct, however. Blossoms in June or July. (12 pounds per bushel.) Lb. 30 cts., 100 lbs. \$25.

Rough-Stalked Meadow (Poa trivialis). This is one of the best of our meadow grasses. It should be used only upon moist soils, and well shaded with other grasses. In such situations it yields good crops. As hay, it shrinks nearly three-quarters of its weight when cut. (14 pounds per bushel.) Lb. 45 cts., 100 lbs. \$35.

Sheep's Fescue (Festuca orina). A low, dense-growing species, well adapted for use in dry pastures; valuable where sheep are kept. (12 pounds per bushel.)
 Lb. 20 cts., 100 lbs \$16.
 Sweet Vernal (Anthoxanthum odoratum).
 One of the first grasses to appear in spring, and remains green late in the

Sweet Vernal (Anthoxanthum odoratum). One of the first grasses to appear in spring, and remains green late in the autumn. It is also remarkable as being almost the only species that possesses fragrance. When cut and drying, the air is filled with its aromatic odor—Perennial. (11 pounds per bushel.) Lb. 75 cts., 100 lbs. \$65.

Sweet Vernal (Anthoxanthum odoratum Puelli). An annual variety of much less value than the Perennial. Lb. 25 cts., 100 lbs. \$18.

Tall Fescue (Festuca elatior). Similar to Meadow Fescue, and by some claimed to be identical; grows well in moist or shady places. (15 pounds per bushel.) Lb. 35 cts., 100 lbs. \$30.

Timothy (Phleum pratense). One of the most important of all the grasses, commonly called "Herd's-grass," and making what is known as "English hay"; thrives best upon rich, heavy soils, upon which it is quite permanent, and produces very heavy crops. (45 pounds per bushel.) Price variable.

Tall Oat-Grass (Avena elatior). An early grass much relished by stock, and producing an abundance of foliage; recommended as one of the best pasture-grasses. Two or three pounds of seed for each acre should be added to the mixture of grass seeds intended for permanent pasture. (12 pounds per bushel.) Lb. 25 cts., 100 lbs. \$20.

Various Leaved Fescue (Festuca Heterophylla). Early hardy perennial. Yields heavily in cold moist soils, and is valuable in mixtures for permanent pastures or mowing. It also grows well in shade. Lb. 30 cts., 100 lbs. \$25.

Water Meadow Grass (Poa Aquatica). Very useful for wet situations, growing well in marshes, bogs, on margins of lakes, streams, etc. Has long creeping roots. Lb. 60 cts.

Wood Meadow (Poa nemoralis). Useful for moist and shady portions of lawns and pastures; generally used in mixture with other grasses. (14 pounds per bushel.) Lb. 45 cts., 100 lbs. \$40.

Grass Mixtures for Pastures and Mowing Lands

The best results are often attained when a mixture of grasses is used; not only can more grass be produced but these mixtures, being composed of early, medium and late sorts, give a much longer season of growth than when only two or three sorts are sown. Some grasses do better in certain locations, and some seasons are better adapted to their development than others; it is, therefore, desirable to take advantage of these conditions, and this can be done by sowing a number of varieties. With this object in view we have carefully arranged the following formulae for different locations. We always prefer autumn sowing if it can be done in September or early in October. It can also be successfully done in November, when the seed will remain dormant during the winter, germinating and often getting a good start early in the spring. We also recommend spring sowing when it can be done early.

FLOWER SEEDS

SOWING, TRANSPLANTING, SOIL, Etc.

Success in the cultivation of flowers from seed depends to a great extent on some of the earlier operations, on which we venture a few suggestions. The first requisite is RELIABLE SEEDS: We spare no pains or expense to procure the VERY BEST. A trial of our seeds will do more to establish this fact than any statement by us would be likely to do. Having obtained the seeds desired for planting, procure suitable boxes or pans, in the bottom of which put pieces of broken pots for drainage, and fill with fine, porous soil, level it carefully and press lightly, so that a comparatively smooth surface may be obtained. Water the surface with a fine rose, and sow the seeds as evenly as possible. Cover with a light, fine soil to a depth twice the diameter of the seed. Very fine seeds require little or no covering at all, a mere pressing into the soil in many cases being sufficient. A pane of glass or piece of paper should be put over them after sowing to retain the moisture, which will generally be sufficient to ensure germination, and will prevent the soil from crusting over. If they should get dry, however, it will be better to water from the bottom by standing the pan a few minutes in water, as topwatering is very apt to wash up the seeds and leave them uncovered on the surface. All seedlings and young plants should be kept as near the glass as possible, and as soon as they are fit to handle they should be

TRANSPLANTED

Into a light rich soil and from two to three inches apart, according to the size the plants are likely to attain before being again moved. Before planting out, give the plants a thorough wetting, and they can then be taken up with balls of earth and planted without drooping, if a little water is given after planting. The best

SOIL

for seedlings, as well as for most flowering plants, is a rich loam, neither too sandy nor too stiff: in such they grow readily and attain great perfection of bloom with little care. The soil should be well broken up and made fine by a free use of the rake. Seedlings should be thinned out before they become in any way crowded, and most varieties transplant successfully.

ANNUALS

Are all plants which grow from seed, flower, mature their seed and die within the course of a year.

Hardy Annuals are so called because they do not require any artificial heat at any period of their growth, and are capable of enduring any ordinary weather from April to October. The seeds may be sown any time from April to October.

Half-Hardy Annuals are those that require artificial heat to assist their germinating, but in some cases this is not absolutely necessary, as a sowing may be made in a warm border in May. It is advisable, however, to make a sowing in heat during March and April, as a much earlier and longer period of bloom is thus obtained. This class embraces some of the most beautiful annuals in cultivation. They should be transplanted and grown under glass until the last of May, when they may be hardened and planted out from nine to twelve inches apart in good garden soil.

Tender Annuals are all annuals which require the protection of glass during the whole season of their growth. A good heat is necessary to germinate the seeds, and they should be transplanted into small pots and shifted on as the pots become filled with roots, and when they have received their last shift, occasional waterings with liquid sheep manure will be very beneficial.

BIENNIALS

Are plants that take two years in their development from seed to the maturation of seed, growing one year, flowering, fruiting and dying the next. The hardy sorts may be sown and treated the same as recommended for Hardy Annuals. The tender varieties are sown in frames or cool houses, where they are kept all winter, and transferred to the open border in May or June. Many of the Biennials will bloom the first season if the seed be sown in February or March.

PERENNIALS

Are plants which, as a rule, bloom the second year from seed, and are more or less permanent thereafter. The term is in most general use in referring to hardy border plants, where it is necessary to distinguish between those which are perennial, and others that are of only annual or biennial duration. Like the Biennials there are many Perennials which bloom the first year if sown early. Seed of Hardy Perennials may be sown in the open borders any time from April to October, though we prefer sowing early enough to get strong plants before cold weather, as they are not likely to winter-kill, whereas the plants from late-sown seed, being small, are more liable to suffer from this cause. The soil should be a good, rich loam.

Tender Perennials require the protection of a greenhouse through winter. The seeds of some of the Perennials will remain in the soil for months before germinating.

General List of Select Varieties of FLOWER SEEDS

Containing all those sorts known to be desirable and worthy the attention of professionals and amateurs

Our seeds are of superior quality. We supply largely florists and market-gardeners, who require and buy only the best.

ASTERS Of Superior Quality

Our Aster seeds are grown for us by some of the most skilful growers on this continent and in Europe, and cannot be surpassed. For best results Asters should have a good, rich soil and plenty of moisture. As the roots are produced near the surface, a mulching during hot weather is very beneficial. The location of the bed should be changed every year.

No.	FOTTLER'S IMPERIAL MIXTURE. This mixture.	Pkt
	original with us, is superior to all others. It is especially selected from the finest large-flowering dou-	
	ble varieties, growing about the same height. The colors are beautiful and in great variety. 2 ftoz. \$4.\$	0 10

NIGELLA

4985 PAEONIA, Double Mixed. Most beautiful hardy
perennials, indispensable for the garden. The flowers are very large and of the most beautiful colors:
they require the richest soil, and grow well in shady
places\$0 10
4990 Single Mixed. Finest sorts
4993 Tree Varieties (Moutan, or Arborea). Shrubby sorts of extra quality, with immense double and
single flowers in fine colors. 3 ft
4995 PALAFOXIA Hookeriana. Pretty annuals from
the Rocky Mountains, with rosy pink flowers freely
produced in loose clusters. July to September. 2 ft

	P
PANSY. Our seeds of this universal favorite are from	
the most noted European growers. The choice	
strains being unsurpassed for size and form of	
flower, beauty of markings, brilliancy and variety of	
colors and shades. For early spring blooming the	
seed must be sown in July and transplanted into	
frames. Spring-sown seed will produce fine blooms	
in summer and fall. Rotted cow or sheep manure	
are the best fertilizers for them, the soil cannot be	
made too rich with either; moisture is necessary,	
and they should not be allowed to get dry during	
hot weather; shelter from strong winds and mid-	
day sun.

ZINNIA, GARDEN PRIZE

SCHLEGEL & FOTTLER Co.;

Gentlemen:—Having used your Flower and Vegetable Seeds for over twenty years, I cannot recommend them too highly. I have purchased seeds from nearly all the large seed merchants in the United States, and can truthfully say that your seeds have given me better satisfaction than any I have ever used. Wishing you many more years of prosperity, I am

MIXED FLOWER SEEDS FOR WILD GARDENS

The introduction of "Wild Gardens" has proved a marked success; and we are constantly in receipt of the most satisfactory evi-The introduction of "Wild Gardens" has proved a marked success; and we are constantly in receipt of the most satisfactory evidence of the estimation in which they are held wherever they have been tried. Any one who has cultivated flowers knows the constant attention necessary in the care of well-laid-out beds and borders to produce the desired effect. To those who cannot give this care, the "Wild Garden" presents a substitute, which, for its unusual and varied effects, cheapness, and the small amount of labor necessary for its construction, has no rival. "Wild Garden" seeds are a mixture of over one hundred varieties of flower seeds, and, being mixed together, can be offered at a much less price than when sold in separate packets. No one who has not seen such a bed can form any idea of its possibilities, the different seasons of bloom insuring something new almost every day.

7495 Dwarf Sorts, up to 1 ft. high. ½oz. pkts., with full directions, 15 cts. each, oz. 25 cts., 4 ozs. 75 cts., 1b. \$2.50. 7500 Tall Sorts, 1 ft. to 5 ft. high. ½oz. pkts., with full directions, 15 cts. each, oz. 25 cts., 4 ozs. 75 cts., 1b. \$2.50.

NITRO-CULTURE THE VEST POCKET FERTILIZER

Nitro-Culture consists of nitrogen-collecting bacteria which work in the soil and on the roots of leguminous (1. t., pod-bearing) plants, having the power to collect free nitrogen from the air and supply it to the plants. All plants need nitrogen, which is very costly when obtained by chemical process. The remarkable increase of crop frequently reported and caused by inoculation, is due wholly to the large amount of nitrogen collected from the air by the bacteria. The bacteria are furnished dried on absorbent cotton and can be readily forwarded by mail to any section of the country. Full directions accompany each package. It has been ascertained from the most reliable sources that the average inoculated leguminous crops, such as clover, alfalfa, vetch, peas, beans, etc., will not only under ordinary conditions show an increase of crop, but also that the bacteria will collect from the air and leave in the soil at the end of the season, after the crop is harvested, not less than 100 pounds of nitrogen per acre.

PRICE-LIST: Trial pkg., 50 cts.; 1-acre pkg., \$1.50; 5-acre pkg., \$5

When ordering, state what particular crop you desire to inoculate.

Alfalfa, or Lucerne. Red, Yellow or Mammoth Clover. Crimson Clover. Alsike, or White Clover.

Burr Clover. Cow, Clay, Whip-O'-Will, Black-eyed Peas.

Garden Peas. Beans (Wax, Garden String, Lima, Kidney). Soy Beans.

Velvet Beans. Vetch. Peanuts Field Peas.

SPECIAL GARDEN SIZE: Sweet Peas 25 cts., Garden Beans 25 cts., Garden Peas 25 cts.

Nitro-Culture cannot be furnished for any crops like corn, wheat, potatoes, cotton, etc., but only those which are mentioned on the above price-list. Perhaps, however, the greatest benefit may be derived the second year, when these crops may be planted on this inoculated land without fertilizer, and produce double what would otherwise be produced.

Summer-Flowering Bulbs and Tuberous Roots

ACHIMENES

One of the finest summer-blooming plants for house or conservatory, giving handsome flowers of many charming shades and colors. Named Varieties. 10c. ea., \$1 per doz.

ACIDANTHERA BICOLOR

Most valuable of all the Cape Bulbs for beauty and fragrance of the flowers. They grow about two feet high, with graceful flower-stalks, each stalk having from four to eight beautiful creamy white flowers with a purple-maroon blotch at the base of the petals. They may be forced in winter like gladiolus, but better results will be had by planting in the open ground about June 1, when they bloom freely during August and September. The bulbs must be kept very warm through the winter. 15 cts. each, \$1.50 per doz.

AMARYLLIS

These are the best suited for pot culture, and when established they should bloom every year; after blooming they make their growth and should have occasional waterings with liquid manure till about September, when they should be allowed to rest and given very little water. A soil composed of loam, leaf-mold and sand should be used and good drainage given.

Aulica platypetala. Large, handsome flowers of a glowing crimson, tipped with green. 75c. ea., \$7.50 per doz. Belladonna Major. Silvery white, flushed with rose; beautiful and fragrant. 15 cts. each, \$1.50 per doz.

Equestris. Bright light scarlet, with white throat and white stripes about half way up the petals. 20 cts. each, \$2 per doz.

Formosissima (Jacobean Lily). Brilliant dark crimson. 15 cts. each, \$1.50 per doz.

Johnsoni. Fine red, with white stripe through each petal. 40 cts. each, \$4 per doz.

Vallota purpurea (Scarborough Lily). Rich, bright searlet flowers in a cluster, blooming in summer and autumn; this is the variety so much seen growing in tubs on lawns. 30 cts. each, \$3 per doz.

Vittata Hybrids. Large-flowered varieties with striped petals. 40 cts. each, \$4 per doz.

Zephyranthes rosea (Fairy Lily). Beautiful rose-pink. 5 cts. each, 40 cts. per doz., \$2 per 100.

ANEMONE, FRENCH

These are also known as the Roman Anemone, and if planted outside in early spring will make a fine display in early summer of large poppy-like flowers in bright and beautiful colors. Plant 2 to 3 inches deep and 6 to 8 inches

Single Mixed Colors. 20 cts. per doz., \$1 per 100.

Double Mixed Colors. 25 cts. per doz., \$1.50 per 100.

BEGONIA (Tuberous-Rooted)

These splendid varieties produce branching plants, covered with bright flowers of various colors the whole summer, succeeding best in partial shade. Roots should be kept in dry sand or similar material away from frost during winter.

Our assortment is from one of the most noted continental growers. The distinctive features of this strain are the dwarf, sturdy habit and erect flower stem, circular-shaped flowers of large size and rich colors, which for either private or exhibition purposes are superior to any strain offered.

Single. Deep Red, Orange, Rose, Scarlet, White, Yellow.

5 cts. each, 60 cts. per doz., \$4 per 100.

Double. Red, Rose, Yellow, White. 12 cts. each, \$1.25 per doz., \$8 per 100.

BESSERA ELEGANS

(Mexican Coral Drops)

Wonderfully free-blooming bulb, with long, narrow, grass-like leaves and slender flower-stalks, 1 foot high, carrying a loose umbel of flowers, each a scarlet bell marked with white lines. 5 cts. each, 50 cts per doz., \$2.50 per 100.

CALLA LILY (Richardia)

An old favorite and too well known to need any description. The only requisites for successful culture are rich soil and plenty of water when growing. By allowing them to rest through the summer an abundance of bloom may be had the following winter.

Elliottiana. Clear, deep canary yellow; the best yellow variety. 75 cts. each, \$7.50 per doz.

White Calla, or Lily of the Nile. The old and popular favorite. 25 cts. each, \$2.50 per doz.

Spotted Leaf. Excellent for bedding. 10 cts. each, \$1

Yellow (Hastata). Light yellow flowers. 25 cts. each, \$2.50 per doz.

CANNA

DORMANT ROOTS

A class of plants for grand effects. Their rich and variedcolored leaves, combined with large and beautiful flowers of brilliant colors, make them very desirable for planting in groups on the lawn, or singly in beds. Keep the roots in a warm, dry place through the winter.

Robusta. Very dark foliage; robust grower, 6 to 8 ft. 10 cts. each, \$1 per doz.

Large-flowering French Mixed. Finest varieties. 10 cts. each, \$1 per doz.

TUBEROUS-ROOTED BEGONIA

GROWING CANNA ROOTS

Selected Large-flowering Varieties

 $3\frac{1}{2}$ to 5 ft. high, according to season and soil, 15 cts. each, \$1.50 per doz. By mail, 5 cts. each extra

Alsace. Sulphur changing to creamy white.
Beaute Poitevine. Large dark crimson.
Chas. Henderson. Fine crimson.
Cinnabar. Cinnabar red, golden edge.
Duke of Marlborough. Rich crimson-maroon.
Egandale. Soft currant red, bronze foliage.
Florence Vaughan. Rich golden yellow, red spots.
J. D. Cabos. Rich apricot, dark foliage.
J. D. Eisele. Vermilion-scarlet, overlaid with orange.

CROZY'S CANNAS

Madam Crozy. Brilliant scarlet, golden border.
Mlle. Berat. Nearest approach to pink.
Pres. Cleveland. Large intense scarlet.
Pres. McKinley. Brilliant crimson-scarlet.
Pres. Carnot. Orange-scarlet with pink.
Queen Charlotte. Bright scarlet, yellow edge.
Red Indian. Beautiful apricot, dark foliage.
Souv. d'Antoine Crozy. Scarlet, golden border.

GIANT ITALIAN, or ORCHID-FLOWERING

6 to 8 ft. high, with immense flowers, 15 cts. each, \$1.50 per doz. By mail, 5 cts. each extra

Allemania (Italia). Orange-scarlet, edged with yellow.
Austria (Burbank). Pure canary yellow, with red dots.
Mrs. Kate Gray. Rich orange-scarlet.
Pennsylvania. Intense vermilion-scarlet.

CALADIUM ESCULENTUM

One of the most beautiful of the ornamental foliaged plants, either for culture in pots, or planting out on the lawn. They will grow in any good garden soil, and are of the easiest culture. The foliage is light green, veined with dark green, and the immense leaves are 3 to 4 feet long by $2\frac{1}{2}$ feet wide.

Extra Large Bulbs. Four inches and over in diameter. 25 cts. each, \$2.50 per doz.; postage 10 cts. each extra. First Size Bulbs. Three to 4 inches in diameter. 15

cts. each, \$1.50 per doz.; postage 5 cts. each extra.

Second Size Bulbs. Two to 3 inches in diameter. 10

cts. each, \$1 per doz.; postage 4 cts. each extra.

Third Size Bulbs. One and one-half to 2 inches in diameter. 6 cts. each, 60 cts. per doz.; postage 3c. each extra.

CINNAMON VINE

(Dioscorea Batatas, or Chinese Yam)

A summer climber, with handsome glossy foliage; flow ers possessed of a delicate cinnamon perfume; the root is hardy in deep, light soils. Large selected roots. 5 cts. each. 50 cts. per doz.

DAHLIAS

These summer- and autumn-flowering plants are more popular than ever. They should not be planted until the weather has become warm and settled in spring, and should be taken up before severe frosts in autumn. They require a sunny situation and rich soil, to bring out their full beauty. One shoot only should be allowed to each root. Roots should be kept in a warm, dry place during winter.

CACTUS DAHLIAS

The following are the finest sorts in cultivation and of the true Cactus form:

Alpha. White, speckled and striped. 25 cts. each. Comet. Silvery rose, speckled crimson. 35 cts. each. Countess of Lonsdale. Salmon-pink. 25 cts. each. Florodora. Deep crimson. 25 cts. each. Gen. Buller. Crimson, white tipped. 25 cts. each. Genesta. Amber, shaded yellow. 25 cts. each.

CACTUS DAHLIA, MRS, J. J. OROWE

CACTUS DAHLIAS, continued

Green's White. Fine white. 25 cts. each.
Harbor Light. Vivid orange-red, tips overlaid with
flame color. 75 cts. each.
J. H. Jackson. Clear rich maroon. 35 cts. each.
Kriemhilde. Soft pink, white center. 25 cts. each.
Lord Roberts. Fine large white. 50 cts. each.
Lovely Ensford. Amber color. 25 cts. each.
Maid of Honor. Peach blossom pink. 75 cts. each.
Mrs. J. J. Crowe. Clear canary-yellow. 25 cts. each.
Octopus. White, lilac tint. 25 cts. each.
Uncle Tom. Rich velvety crimson. 25 cts. each.

Other choice varieties, 20 cts. each, \$2 per doz.

DOUBLE DECORATIVE DAHLIAS

Alfred Eldred. Rich crimson. 25 cts. each.
Claribel. Rosy purple. 15 cts. each.
Grand Duke Alexis. White, shaded pink. 25 cts. each.
J. R. Baldwin. Salmon-pink. 15 cts. each.
Mad. Van den Dael. Silvery pink. 25 cts. each.
Maid of Kent. Crimson, white tips. 15 cts. each.
Mrs. Chas. Turner. Fine yellow. 25 cts. each.
Mrs. Hartong. Fawn, suffused pink. 25 cts. each.
Mrs. Roosevelt. Delicate soft pink. 25 cts. each.
Mrs. Winters. Large pure white. 25 cts. each.
Oban. Rosy lavender and fawn. 20 cts. each.
Papa Carmett. Crimson-maroon. 25 cts. each.
Santa Cruz. Yellow, edged pink. 75 cts. each.

Other choice varieties at \$2 per doz.

Souv. Gustav Douzon. Orange-red. 40 cts. each.

DOUBLE SHOW DAHLIAS

Admiral Schley. Crimson, striped white. 15 cts. each. Dr. J. P. Kirkland. Dark crimson. 15 cts. each. Dr. Keynes. Reddish buff. 20 cts. each. Emily. White, suffused lavender. 15 cts. each. Ethel. Yellow tipped with white. 15 cts. each. Keizer Wilhelm. Yellow tipped with red. 20 cts. each. Marjorie. Lemon, shaded amber. 15 cts. each. Meteor. Bright scarlet. 15 cts. each. Mrs. West. White, shaded with rose. 15 cts. each. Ohi. Lilac, striped with crimson. 15 cts. each. Progress. Rosy lake, striped crimson. 15 cts. each. Robert Bloomfield. Pure white. 15 cts. each.

Other choice varieties, \$1.50 per doz.

DOUBLE POMPON, or BOUQUET DAHLIAS

Amber Queen. Clear amber. 15 cts. each.
Catharine. Bright yellow. 15 cts. each.
Clara Hurch. Yellow, crimson-lake edge. 15 cts. each.
H. Miliesky. Crimson. 15 cts. each.
Hypatia. Amber, shaded fawn. 15 cts. each.
Iolanthe. Orange-buff, white blotched. 15 cts. each.
Juliet. Yellow, tipped orange. 15 cts. each.
Nellie Broomhead. White, tipped lilae. 15 cts. each.
Red Indian. Deep coral red. 15 cts. each.
Snowclad. Small, pure white. 15 cts. each.
Sunny Daybreak. Apricot, red edge. 15 cts. each.
Wm. Nitche. Claret and white. 15 cts. each.
Other choice varieties. \$1.50 per doz.

SINGLE-FLOWERED DAHLIAS

We have a large collection of the leading sorts in all colors. 15 cts. each, \$1.50 per doz.

GLOXINIA (Large-Flowered)

Magnificent for house culture, producing in great profusion beautiful flowers of the richest and most beautiful colors. They succeed best in sandy loam and peat, and require a moist heat. After blooming, dry off gradually, let the bulb remain in the pot without water, and keep in a warm place until they show signs of starting again.

GLADIOLUS

Of summer-blooming plants for general garden decoration, the Gladioli are deserving of special attention. Requiring but little room for growth, they are exceedingly useful for planting among shrubbery in the border, while for massing in large beds, where a brilliant and effective display is desired, they are invaluable. They succeed best in good loam, enriched with well-rotted manure. Bulbs should be planted about 3 in. deep and 6 in. apart.

Our mixtures are made up from fine varieties, and are all selected, first-sized bulbs and sure to give the best results. If wanted by mail, add 10 cts, per doz. for postage.

HYACINTHUS CANDICANS

A magnificent species, with flower stems 3 feet high, bearing large, pure white flowers in July and August. It is perfectly hardy. 5 cts. each, 50 cts. per doz., \$2 per 100; by mail, 10 cts. each.

IRIS GERMANICA (German Iris)

They form a group unparalleled in beauty. Every shade of color may be found among them, and as they will thrive in almost any soil or situation they must be considered necessary in every garden. For the wild garden, shrubbery borders, margins of water, rockwork, etc., they are admirably adapted.

Choice Varieties. 15 cts. each, \$1.50 per doz.

Best Named Varieties. 25 cts each, \$2.50 per doz.

IRIS KAEMPFERI (Japan Iris)

One of the most astonishing tribes of plants ever seen, both in its robust, free-blooming habit and in the superbloveliness of its immense flowers. These differ from the other Irises in having the blossoms broad and flat, like a Clematis; growing best in moist, rich soils.

Choice Named Varieties. 25 cts. each, \$2.50 per doz. Choice Mixed Sorts. 15 cts. each, \$1.50 per doz.

LILIUM AURATUM

LILIES

In the flower garden Lilies rank first in importance. They are stately and beautiful, matchless in form and variety of color, while possessing the most agreeable perfume, and for general effect they have no rivals. Bulbs should be planted 6 inches deep in a well-drained, deep, loamy soil made rich with thoroughly rotted manure, and an inch of clean sand placed under and over the bulbs when setting.

MONTBRETIA

One of the best and brightest summer-flowering bulbs, sure of becoming firm favorites wherever grown. Planted in clumps from April to June they produce numerous graceful spikes of brilliant star-shaped flowers. Hardy with protection.

Crocosmiaeflora. Brilliant orange-scarlet. 20 cts. per

doz., \$1 per 100.

Etoile de Feu. Vermilion, yellow center. 30 cts. per doz., \$2 per 100.

Gerbe d'Or. Bright yellow. 25c. per doz., \$1.75 per 100. Germania. New; large flowers, over 3 inches across, of a rich glowing orange-scarlet, with blood-red throat. 10 cts. each, \$1 per doz.

Pottsii grandiflora. Orange and scarlet. 25 cts. per doz., \$1.75 per 100.

Rayon d'Or. Yellow, brown spotted, 25 cts. per doz.,

\$1.75 per 100. Rosea. Salmon-rose. 30 cts. per doz., \$2.25 per 100.

Transcendent. Orange and vermilion. 25 cts. per doz., \$1.75 per 100.

PAEONIES

These have become indispensable in every garden. They are all hardy and admirably adapted to our northern climate, growing in almost all situations, and even flourishing under shade trees.

50 cts. each, by express

Carnea elegans. Blush, yellowish center. Comte de Diesbach. Dark red or purplish crimson. Denis Helye. Dazzling red. Edouard Andre. Glossy crimson-maroon. Edulis superba. Clear flesh-pink with carmine tinge. Eugenie Verdier. Rosy pink, blush center. Faust. Delicate lilac-pink, yellow center. Festiva maxima. Snow white, center flaked crimson. Grandiflora. Bright pink. Grandiflora alba. Large white. Humei carnea. Pale rosy flesh. L'Esperance. Pale rose spotted with carmine. Louis Van Houtte. Brilliant satiny crimson. Mad. Chaumy. Large satiny rose.

Marie Lemoine (Achille). Pale pink, almost white.

TREE PEONIES. These form in time shrubs 5 or 6 ft. high. \$1 to \$1.25 each.

Officinalis rubra. Deep blood-red. Queen's Perfection. Yellowish white. Queen Victoria. Rosy white, center deep rose.

MADEIRA VINE

A rapid-climbing plant, with beautiful wax-like, light green leaves and feathery white flowers, with a delicious fragrance resembling mignonette. The culture is simple; the roots need but to be planted, and a trellis or strings given the vine to climb on. 5 cts each, 40 cts. per doz., \$2.50 per 100.

PÆONIA, FESTIVA MAXIMA

MILLA BIFLORA

One of the loveliest and most desirable bulbs known. The flowers are borne on stems, two to three in number. of pure waxy white, and 2 inches in diameter. It will throw up as many as six flower-stalks from one bulb, and continue in bloom a long time. 5 cts. each, 50 cts. per doz., \$3 per 100.

TIGRIDIA (Tiger or Shell Flower)

Extremely handsome, summer-flowering bulbs, growing about 2 feet high and producing freely throughout the summer large, gorgeous flowers exquisitely spotted. They require the same treatment as gladioli before and after blooming.

Conchiflora. Rich yellow, crimson-spotted center. 50 cts. per doz., \$3.50 per 100.

Grandifiora alba. Pearly white, with yellow center, spotted with crimson. 50 cts. per doz., \$4 per 100.

Pavonia grandiflora. Bright crimson; center spotted

yellow. 50 cts. per doz., \$3.50 per 100.

TUBEROSE

A bulbous plant of the easiest culture and most delightful fragrance, suitable for the summer garden or house culture throughout the year. They should be started early in pots, using good, rich, loamy soil, and when the weather is suitable, transplanted into the garden. The variety offered is the one most extentensively grown, be ing much superior to all other sorts,

Excelsior Pearl. A superior strain, with very large double white flowers, produced in great abundance. Extra strong roots. 35 cts. per doz., \$2 per 100.

ZEPHYRANTHES (Zephyr Flower)

These are among our most beautiful dwarf bulbous plants. Very effective for planting out in the border in May, flowering freely during the summer; they do best in a warm, sunny situation. They are also suitable for pot culture during the winter.

Rosea. Beautiful rose-pink. 5 cts. each, 50 cts. per doz.

AQUATICS

The cultivation of Aquatics is of the simplest; their requirements are sunshine, water and plenty of rich soil. They are divided into two classes, hardy and tender; the former may be planted in ponds, lakes or sluggish streams, early in the spring, and, under the same conditions as our native Water Lily, they will grow luxuriantly and flower profusely the

entire season; provide the same conditions in artificial ponds or tanks, and the results will be equally satisfactory. Plant the tender varieties at the approach of warm weather and when the water is warm. The plants can be grown in pots where protection can be afforded them until safe to transfer to summer quarters The after-treatment is the same as for the hardy varieties. When grown in tubs only the moderate growers should be selected. In storing in tubs through the winter, they should be kept where it is not warm enough to excite growth or so cold as to freeze.

Select List of Hardy Perennial Plants

We would recommend those who have never undertaken the culture of Hardy Plants to commence with a few varieties most easily grown, and gradually increase their collections from season to season, and, our word for it, it will lead to a confession that there is nothing in the way of bedding-out or ribbon gardening which can compare in any way to the beauty and refined charm of this class of plants. We can furnish a good selection of Hardy Plants, which may be expected to give successional bloom throughout the spring, summer and fall months, and, if the choice is left to us, will take special care to select such varieties as afford the most satisfactory results.

Any sorts not listed can be furnished at lowest prices	Each

ROSES

Sorts not specified in this list can be furnished at lowest prices

HARDY HYBRID PERPETUALS

The Rose is the one plant that needs no praise and little comment. Every one knows the Rose, and no garden is ever satisfactory without its Rose-bed. The secret of success is simply this: Throw out the soil 2 feet deep, and put in any kind of manure 1 foot deep, incorporate it with earth a little, and then cover it with 4 inches or more of soil, then plant the Rose bushes firmly, and fill up with good soil. Roses should be planted very deep, except in very clayey soils.

The Rose-bed should be in the full sun, if possible, and the surface be left a little hollow, so that water may be put on in summer and settle to the roots. Such beds will be full of healthy bushes and glorious blossoms.

Strong, 2-year-old, dormant plants, 30 cts. each, \$3 per doz., by express only

Alfred Colomb. Bright carmine-crimson, large and full.
American Beauty. Very fragrant, deep rose.
Anne de Diesbach. Large, clear bright carmine.
Baroness Rothschild. Rich satiny pink; excellent.
Baron de Bonstettin. Dark red, almost black; large.
Boule de Neige. Pure white, medium size.
Caroline de Sansal. Clear rose, darker in center.
Captain Christy. Deep flesh color, long bloomer.
Charles Lefebvre. Brilliant velvety crimson; fine.
Clio. Flesh-color, rich pink center.
Countess of Oxford. Large, carmine-red.
Countess of Roseberry. Reddish salmon, splendid.
Coquette des Blanches. Pure white, very free.
Crimson Bedder. Scarlet-crimson, free bloomer.
Dr. Andre. Brilliant red, large and imbricated.
Duchess of Bedford. Fiery crimson, perfect form.
Duke of Albany. Velvety crimson, turning black.

TEA AND HYBRID TEA ROSES

Strong plants, 50 cts. each, \$5 per doz.

We offer the leading well-tested varieties, which have proved most satisfactory for garden and house culture. They can be wintered safely by covering 6 to 8 inches deep with light, dry material.

HARDY MOSS ROSES

Strong plants, 50 cts. each

These require close pruning, and strong rich soil for best results.

Blanche Moreau. Pure white, constant bloomer. Common Moss. Pale rose; a great favorite. Comtesse Murinais. White, tinged with flesh. Crested. Very fragrant, deep pink buds. Gracilis. Deep pink, beautifully mossed. Laneii. Clear red, free from mildew. Little Gem. Double crimson, miniature variety. White Bath. The finest white moss rose.

FRUIT TREES

APPLES

Bright, healthy trees are sent from the nurseries, and no others. When received, they should have one-half of last season's growth cut back, and they will be sure to thrive. Nothing is so injurious to newly planted fruit trees, especially to those which have made a very vigorous growth the year before, and have long shoots of new wood, as to leave them full length. That is, the very best trees suffer most by leaving all the top on. Don't be afraid to cut.

5 to 7 ft., 50 cts, each

SUMMER VARIETIES

Early Harvest. Yellow, medium size. Early Strawberry. Red striped, small. Golden Sweet. Greenish yellow, large. Red Astrachan. Red, large. Sops of Wine. Red, medium size. Sweet Bough. Pale yellow, large,

AUTUMN APPLES

Alexander. Red striped, large. Fall Pippin. Greenish yellow, large. Gravenstein. Red striped, large. Late Strawberry. Yellow and red, medium.
Maiden's Blush. Red, medium size.
Porter. Yellow, large.
Rome Beauty. Yellow and red, large.

WINTER VARIETIES

Baldwin. Red, large. Ben Davis. Yellow and red, large. Fameuse (Snow Apple). Red striped, medium size Hubbardston Nonsuch. Yellow and red, large. King. Crimson, large.
Lady's Sweet. Yellow and red, large.
Northern Spy. Yellow and red, large.
R. I. Greening. Greenish yellow, large.

WINTER APPLES, continued

Roxbury Russet. Medium to large.
Spitzenburgh. Red, medium, excellent.
Talman Sweet. Yellow, medium size.
Twenty Ounce. Striped, large.
Wealthy. Red, medium size, fine.
Winesap. Yellow and red, medium size. York Imperial. Yellow and red, large.

CRAB APPLES

5 to 7 ft., 50 cts. each

Hyslop. Dark crimson; large.
Red Siberian. Red-striped; medium size.
Transcendent. Yellow and red; large. Yellow Siberian. Yellow; medium size.

CHERRIES

75 cts. each

Belle d'Orleans. Yellow and red, large. June. Bigarreau. Amber and red, large. June. Bigarreau Napoleon. Yellow and red, large. July. Black Eagle. Deep purple, large. July.
Black Heart. Deep black, large. June.
Black Tartarian. Purplish black, large. June. Coe's Transparent. Amber and red, medium. June. Downer's Late. Lively red, medium. July. Early Richmond. Bright red, medium. June. Elton. Yellow and red, large. June.

Gov. Wood. Yellow and red, large. June.

May Duke. Dark red, medium. June.

PEARS

Remember that Pear trees must have rich soil. Never, however, put manure of any kind where it will touch the roots when a tree is first planted. It is sure death to it. Put it in the soil, near them, liberally, for Pear trees.

5 to 7 ft., 75 cts. each

SUMMER VARIETIES

Bartlett. Yellow, large. Clapp's Favorite. Yellowish green, large.

Doyenne d'Ete. Yellow, red dots, small.

Souvenir de Congress. Yellowish green, large.

AUTUMN VARIETIES

Beurre Bosc. Russet color, large. Beurre Hardy. Greenish russet, large. Flemish Beauty. Yellowish green, large. Howell. Light yellow, large. Louise Bonne. Yellowish green, small. Seckel. Yellowish russet, small. Sheldon. Russet-yellow, medium size.

WINTER VARIETIES

Anjou. Russety yellow, large. Clairgeau. Yellow and red, large. Dana's Hovey. Yellow, russet-netted, small.
Duchesse d'Angouleme. Yellow, large.
Lawrence. Yellow and red, medium.
Vicar. Pale yellow, large.
Winter Nelis. Yellow and red, medium size.

PEACHES

Keep the leading branches well pruned back, and in the spring prune back all shoots of the previous year's growth, thus insuring sound and well-furnished heads with bearing wood, weak shoots being reduced one-half and stronger ones from one-third up, being careful to retain an adequate supply of fruit-buds. Keep the ground clean and well worked about the trees, and give an occasional dressing of wood ashes

25 cts. and 50 cts. each

Champion. Creamy white, red cheek; large. August 1. Crawford's Early. Yellow and red; large. August. Crawford's Late. Yellow and red; large. September. Crosby. Yellow; freestone. September. Early York. Red; medium. August. Elberta. Large; light yellow. August.
Foster. Yellow and red: large. August.
Hale's Early. White and red; medium. July.
Oldmixon Free. White and red; large. September. Smock Free. Orange and red; large. October. Stump the World. White and red; large. Sept.

PLUMS

The growth of the Plum tree is being better understood by cultivators, thorough culture and careful attention to the destruction of the black knot and curculio being the most essential points to consider.

5 to 6 ft., 75 cts. each

Bavay's Green Gage. Greenish yellow; large. Sept. Coe's Golden Drop. Yellow; large. September. German Prune. Blue; medium. September. Lombard. Violet-red; medium. September. Shropshire Damson. Purple; medium. October.

JAPAN PLUMS

These have quickly found favor among growers on account of their great vigor, freedom from disease, and the fact that they come into bearing two or three years after planting. They are of high quality, beautiful in appearance, and keep for an unusually long period after picking.

75 cts. each

Abundance. The fruit is large; amber in color, turning to a rich, bright cherry, and highly perfumed; flesh tender and of delicious sweetness. It ripens in August, and cannot be too well spoken for its adaptability to general cultivation.

Burbank. Clear cherry-red, with vellow dots; flesh deep yellow, rich and sugary. The tree is low and spreading.

and an abundant bearer.

Wickson. A magnificent hybrid. A cross between Burbank and Kelsey, and thought to be the finest yet produced. Fruit large, dark, showy and of the highest quality. Free, most vigorous and prolific.

QUINCES

50 cts. each

Apple, or Orange. Large, roundish; bright golden yellow; very productive. Early to late. Champion. Large; yellow; very productive, and ripen-

ing very late.

Rea's Mammoth. Large; yellow; one of the best. Early.

BEECH (Fagus)-

American (*F. terruginea*), 5 ft. \$1.25 each. **Fern-leaved.** 4 ft., \$1.50 each; 5 ft., \$2.

Rivers' Purple. 3 to 4 ft., 75c. each; 5 to 6 ft., \$1.50.

CATALPA-

Speciosa. 7 to 8 ft. 75 cts. each.

Speciosa aurea. Dwarf, with golden foliage. 6 to 7 ft. \$1 each.

ELM (Ulmus) -

American. 6 to 7 ft., 50 cts. each; 9 to 10 ft., \$1. English (*U. campestris*). 7 to 8 ft. 75 cts. each.

HORSE-CHESTNUT (AEsculus)

Common. 6 to 7 ft., 75 cts. each; 8 ft., \$1.25.

Double-flowering. 6 to 7 ft. \$2 each.

Dwarf. 3 ft. \$2 each.

Red-flowering. 6 ft. \$2 each.

SWEET CHESTNUT (Castanea) -

American. 5 to 6 ft., 75 cts. each; 8 ft., \$1.

LINDEN (Tilia) -

American (Basswood). 7 to 8 ft. \$1 each. European. 7 to 8 ft. \$1.50 each.

LOCUST (Robinia)-

Clammy (R. viscosa). 6 ft. 50 cts. each. Honey (Gleditschia triacanthos). 6 ft. 75 cts. each.

Yellow. 6 ft. 50 cts. each.

MAPLE (Acer)-

English, or Cork-barked (A. campestre). 7 ft. 75 cts. Norway (A. platanoides). 6 to 8 ft., 50 cts. each; 8 to 10 ft., 75 cts.; 10 to 12 ft., \$1.25.

Red, or Scarlet (A. rubrum). 8 ft. \$1.25 each.

Silver (A. dasycarpum). 9 to 10 ft. \$1 each. Sugar, or Rock (A. saccharinum). 8 ft., 50 cts. each;

.9 to 10 ft., 75 cts.; 10 to 12 ft., \$1.

Japanese. Numerous varieties, with foliage of various

forms and colors. 2 ft., \$1.50 each; 3 ft., \$2.

OAK (Quercus).

Black (Q. tinctoria). 5 to 6 ft. \$1.25 each. English Royal (Q. Robur). 5 to 6 ft. \$1.50 each. **Mossy Cup** (Q. macrocarpa). 5 to 6 ft. \$1.25 each. **Pin** (Q. palustris). 6 ft. \$1.50 each.

Red (Q. rubra). 3 to 4 ft., 50 cts. each; 6 ft., \$1.50. Scarlet $(Q.\ coccinea)$. 4 ft., 50 cts. each; 7 ft., \$1. White $(Q.\ alba)$. 4 ft. 75 cts. each.

POPLAR (Populus)-

Aspen (P. tremula). 7 ft. 75 cts. each.

Bolleana. Pyramidal habit. 8 ft. \$1 each.

Carolina, or Cottonwood. 8 to 10 ft., 50 cts. each;

10 to 12 ft., 75 ets.

Golden. 8 ft. \$1 each.
Lombardy. 6 to 8 ft., 50 cts. each; 10 to 12 ft., 75 cts.
Silver (P. alba). 7 to 8 ft. 75 cts. each.

SMALL FRUITS

BLACKBERRIES

To keep a Blackberry bed in good productive condition, the old, weak and dead wood should be cut out every season to give strength to the young shoots for the next year's bearing. In spring the weakest suckers should be removed, leaving five or six of the strongest in each hill; the ground should be spaded and a top-dressing of manure given. Rows 5 feet apart and plants 4 feet apart in the rows.

\$1 per doz., \$5 per 100

Agawam. Sweet, medium size. Early,

Eldorado. Extra fine and very hardy, large, sweet berry. Erie. One of the best; large and productive. Early.

Kittatinny. Large; one of the best. Medium.

Lawton. Large, sweet, fine. Late. Snyder. Medium size, very fine. Medium.

Wachuset. Fair size, good quality. Comparatively free from thorns. Medium.
Wilson, Jr. Large, excellent. Early.

EVERGREEN TREES

ARBORVITAE (Thuja)-

American. 3 ft. 50 cts. each. Globosa. Round dense sort. 2 ft. \$1 each.

Little Gem. Dwarf; dark green. 1½ ft. \$1 each. Peabody's Golden. Golden foliage. 2 ft. \$1.50 each.

Pyramidalis. Compact habit. 3 ft. \$1 each.

Siberian. 2 to 3 ft. 75 cts. each.

LARCH (Larix)-

European, or Scotch (L. Europæa). 3 ft. 75c. each.

FIR (Abies)-

Balsam (A. balsamea). 2 ft. \$1 each.

European Silver (A. pectinata), 2 ft. \$1.25 each. Nordmann's Silver. From Crimean Mountains, 2 ft. \$2 each.

JUNIPER (Juniperus)—
Common Spreading (J. communis). 75 cts. each.
Common Spreading. Golden foliage. \$1 each. Irish (J. Hibernica pyramidalis). 2 to 3 ft. 75c. each.

Virginiana (Red Cedar), 3 ft. 75 cts. each.

PINE (Pinus)-

Austrian (P. austriaca). 1 to 2 ft. 75 cts. each. Dwarf (P. Mugho). 1½ to 2 ft. 75 cts. each. Red (P. resinosa). 2½ ft. \$1 each.

Scotch (P. sylvestris). 2 to 3 ft. \$1 each.

Stone (P. Cembra). 2 to 3 ft. \$1.50 each. White (P. Strobus). 3 ft. 50 cts. each.

SPRUCE (Picea) -

Alcock's (P. Alcockiana). 2 ft. \$2 each.

Black (P. nigra). 2½ ft. \$1 each.

Black Dwarf (P. nigra pumila). 1 ft. \$1.50 each.

Colorado Blue (P. pungens). We have taken care to select and propagate only the intensely blue forms.

Specimens, 2 to 2½ ft., \$5 each; 3 to 3½ ft., \$7.

Eastern (P. orientalis). 2 ft. \$2 each. Hemlock (P. Canadensis). 3 ft. 75 cts. each. Norway (P. excelsa). 3 to 4 ft. 75 cts. each.

White (P. alba). 2 to 3 ft., 75 cts. each; 4 ft., \$1.25.

WEEPING TREES

2- to 3-year heads

Ash. Fine specimens. \$2 each.

Ash, Mountain. \$1 each.

Beech. \$2 each.

Birch, Cut-leaf. 7 to 8 ft. \$1.50 each.

Elm, Camperdown. A fine tree. \$1.50 each. Japanese Cherry (Cerasus Japonica). \$1.50 each. Maple, Wier's Cut-leaf. 8 ft., \$1; 10 ft., \$1.50. Willow, Kilmarnock. \$1 each.

CURRANTS

\$1 per doz., except when noted.

Black Naples. Large, black, for preserves.

Cherry. Large, red, popular sort. Fay's Prolific. Largest and finest red. \$1.50 per doz. Red Cross. Excellent quality, good size and very prolific.

Versaillaise. Large, red, excellent. White Grape. Very large, white

GOOSEBERRIES

Industry. An English variety, with large dark red fruit. free from mildew. \$2.50 per doz.

Red Jacket. An American variety with large ruby red fruit, fine flavor and free from mildew. \$2.50 per doz.

Pearl. Prolific sort; free from mildew. The fruit is large; light green and of fine quality. \$2 per doz.

Downing. Whitish green, prolific. \$1.50 per doz.

GRAPES

HARDY VARIETIES

35 cts. each, except where noted

BLACK

Concord. Large, always reliable. Medium.

Eaton. Very large, new. Medium.

Hartford. Large and productive. Early.

Mills. Very large berry and clusters, rich flavor. Medium. 50 cts. each.

Moore's Early. Large, fine quality. Early.

Wilder (Rogers' No. 4). Very large. Medium.

Worden. Large, excellent quality. Early.

RED

Brighton. Large, best quality. Early.

Delaware. Small, delicious. Late.

Ionia. One of the finest table Grapes, high flavor and long keeper. Late.

Vergennes. Large, splendid. Medium.

WHITE

Empire State. Tender. Medium.

Green Mountain. One of the best. Early.

Moore's Diamond. Large, excellent. Early

Niagara. Large and productive. Medium.

FOREIGN VARIETIES

For growing under glass. \$3.50 each

BLACK

Alicante. Very large, fine quality.

Black Hamburg. The best for general use.

Gros Colman. Very large, sweet and juicy.

Madresfield Court. Large, rich muscat flavor.

WHITE

Bowood. Large, with a sweet muscat flavor.

Golden Chasselas. Large, excellent sort.

Golden Hamburg. Large bunches; one of the best.

Muscat of Alexandra. A delicious variety.

RASPBERRIES

Treat and cultivate as recommended for Blackberries \$1 per doz., \$5 per 100

Clarke. Large red, firm; one of the best.

Cuthbert. Medium to large, red, sweet.

Marlboro. Popular red sort, early and hardy.

Shaffer's Colossal. Large, purplish red; fine.

Loudon. Very prolific; one of the hardiest and best red

Golden Queen. Large, yellow, firm; fine quality.

Gregg. Large, black cap, great bearer.

Mammoth Cluster. Large and productive, black cap.

Souhegan. Large and early, black cap.

STRAWBERRIES

The Strawberry will grow in any good garden soil where the ground has been thoroughly prepared. For family use we recommend planting them in double rows, I foot apart each way and 5 feet between the double rows, allowing sufficient number of runners to grow into the wide passage to cover about 1½ feet on each side; all the rest should be

STRAWBERRIES, continued

pinched off. It is advisable to cover the plants in winter with litter, which should be removed as soon as the plants commence to grow in spring.

Layer plants in spring, \$1 per 100, \$7 per 1,000, except where noted. Pot-grown plants after August 1, \$3 per 100, \$25 per 1,000.

Belmont. Large, oblong, crimson, very solid. Medium.

Brandywine. Large, roundish conical, bright, glossy crimson berries, firm and solid; excellent quality and fine flavor. Medium.

Bubach No. 5. (P) Very large and productive, bright scarlet; a fine market sort. Early to medium.

Commonwealth. Large, glossy crimson berry, of excellent quality, a great cropper and one of the latest. \$1 per 100.

Clyde. Fine scarlet berries as large as Bubach and about a week earlier; very productive. Early.

Gardy. Large, bright crimson berries of uniform size; best of late sorts, ripening two weeks after Sharpless.

Glen Mary. Very large, highly colored, firm, and ranks with the best in flavor. Medium to late.

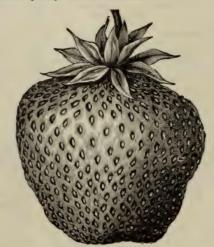

Great Ruby. Very large, deep lustrous, crimson, rich flavor. Medium to late. \$1.50 per 100.

Latest. (P) Large, handsome berry, very dark and extra fine quality; one of the most productive. 50 cts. per doz., \$2 per 100.

Marshall. Large, rich crimson, and fine flavor. One of the most popular sorts. Medium.

Miller. Large, bright glossy red, roundish berry, of fine flavor. Early to medium.

Minute Man. (P) Very productive, long-season sort, of excellent quality. Medium to late.

Nick Ohmer. Largest size, regular form, excellent flavor, firm, and a deep, glossy red. Medium.

President. (P) Extra large, solid, rich crimson berries, very productive. Medium to late. \$1.50 per doz.

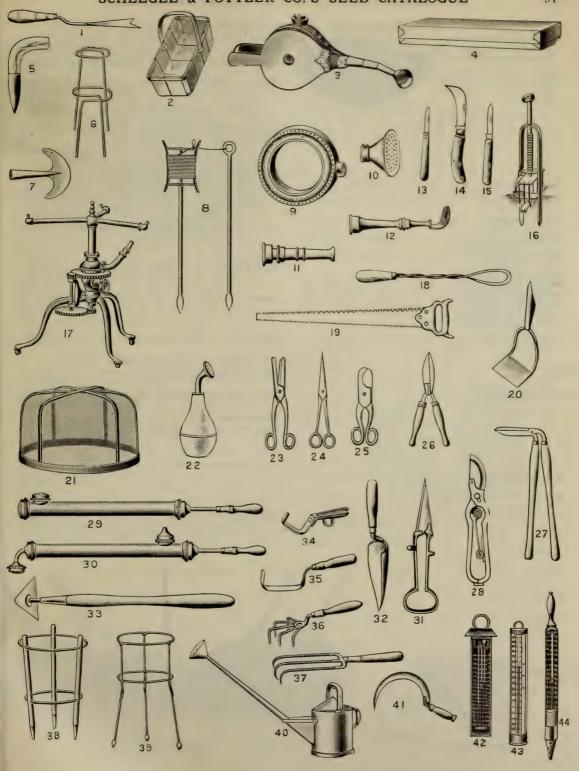

Rio. A good early sort and large for an early berry, fine flavor, firm and colors evenly.

Sample. (P) Large, bright scarlet; very prolific and fine quality.

Success. Large, round, bright scarlet, flavor always fine. Early.

Garden Wheelbarrows, Ames. No. 2, \$3.60; No. 3, \$3.80; No. 4, \$4; No. 5, \$4.70.

Garden Wheelbarrows, Syracuse. The frame is made of well-seasoned ash, with three crossbars, mortised into the handles. The bottom boards are set into the rear crossbar, which prevents splitting at the ends. Strongly braced throughout. Handles, legs and wheel are painted red, sides and front olive; handsomely striped. Medium steel wheel, 3 in. tire, \$4; large steel

wheel, 3-inch tire, \$4.25. Garden Lines. Braided and made of best material; will not kink. 100 ft. 60 cts. each.

Garden Reels. For garden lines. Small, 50 cts. each; large, 75 cts. (Fig. 8.)

Grafting Wax. A superior article, made expressly for us. It is neatly put up in pound, half-pound and quarter-pound packages. 4lb. 10 cts., lb. 30 cts.

GARDEN WHEELBARROW

Glass Cutters. 15 cts. each

Gloves. Garden and pruning. 75 cts. to \$1,50 per pair. Grass Hooks, or Sickles. English, 50c, each, (Fig. 41.) Blue Ribbon, 50 cts.

Glaziers' Points, Peerless. Made of steel wire and galvanized. 60 cts. per box of 1,000; by mail, 75 cts. Pincers for driving, 40 cts.; by mail, 50 cts.

Nº 2 PEERLESS GLAZING Glaziers' Points, Siebert's. Made POINT of zinc; they will not rust. Made in two sizes, $\frac{5}{8}$ and $\frac{7}{8}$ in. long.

FULL SIZE

Each size, 40 cts. per lb. SIEBERT'S GLAZING Hose Nozzle, Boston Rose Spray. POINT For the greenhouse, flower garden, hotbed lawn, etc. Having a flat face, it throws the water straight ahead and does not spread it too much. It is made of brass, strongly put together. 65 cts. each.

(Fig. 10.) Hose Nozzle, The "Deming · Vermorel" Spray. Simple in construction and throws a finer spray than any nozzle in use. 1/4 inch pipe, \$1; reducer for 3/4 inch connection, 25 cts.

Hose Nozzle, Greenhouse Spraying. Made of heavy brass. For 34-in. hose, 3-in. face, 50 cts.; 4-in. face, 75 cts.; shut-off connection, 50 cts.

Hose Nozzle, New Boston. Will throw a coarse or fine spray, or a large or small stream, as may be desired. Small, 50 cts. each; by mail, 60 cts. Large, 75 cts.; by mail, 90 cts. (Fig. 11.)

Hose Nozzle, Child's Rain Maker. 35 cts. each; by mail, 45 cts. (Fig. 12.)

Hose Nozzle and Sprayer, "Imp." \$2 each.

Hoes, Arlington Scuffle, Handled. 5-in., \$1.25; 6-in., \$1.25; 7-in., \$1.40; 8-in., \$1.50; 9-in., \$1.65; 10-in., \$1.85.

Hoes, Scuffle, Common. Handled. 6-in., 40 cts.; 7-in., 45 cts.; 8-in. 50 cts.; 9-in., 55 cts.; 10-in., 60c. (Fig. 20.)

Hoes, Daisy Scuffle. 6-in., 35 cts.; 8-in., 40 cts.

Hoes, Garden, or Square. Shank 6 to 8 inch, 35 cts. each. Socket, 9 to 10 in., 55 cts. each.

Hose Couplings. 25 cts. per set.

Hose Menders, Hudson's. Boxes containing 6 menders, 20 wires and 1 plier, 50 cts.; by mail, 65 cts. Menders for ½ in. hose, 30 cts. per doz.; by mail, 35 cts. Menders for ¾ in. hose, 40 cts. per doz.; by mail, 45c. Pliers, 30 cts. each; by mail, 35c. Wires, 15c. per doz.

Hose Menders, Cooper's. A simple, practical mender made of heavy brass, which will not wear or rust out; requires no wires or pliers to adjust it. 10c. each, 3 for 25 cts., 75 cts. per doz.

Hose Nozzle, Fairy. Will throw either a spray or single stream. 75 cts. each.

Nozzle, Bordeaux Spray. 75 cts. each; with reducer for 34-in. hose, \$1.

Hose Reel. All Iron. Light, strong, durable. No. 10, for 100 ft., \$3; No. 20, for 150 ft., \$3.50; No. 30, for 400 ft., \$5.

RUBBER HOSE

Hose, Rubber. The hose we offer is of the best manufacture. We keep no second grade. S. & F. Co.'s Samson, ½ in., 7-ply, 14c. per ft.; ¾ in., 7-ply, 16c. per ft. Insect Powder Gun, Cyclone. 10 cts. each. Insect Powder Gun, Jumbo. 20 cts. each.

Ink, Indelible. For marking on zinc labels. Small bottles, 20 cts.; large, 35 cts

Knives, Budding and Pruning. Savnor's and Wostenholm's; various styles. 75c. to \$1.50 each. (Figs. 13, 14 and 15.)

Knives, Budding. Twin brand. 75 cts. to \$1.25 each. Knives, Grafting and Chisel. Small, 50 cts. each; large, 75 cts.

Lawn Sprinkler, Fountain. Made of brass. Easily moved over the lawn without turning off the water. \$1.25 each. (Fig. 9.)

Lawn Sprinkler, The Globe. \$1 each; by mail, \$1.20. Lawn Sprinkler, Deluge. Throws a large quantity of

water; cannot clog. 60 cts. each; by mail, 75 cts.

Lawn Sprinkler, Twin Comet. Very useful on large lawns, thoroughly sprinkling an area 80 ft. in diameter. Height, 17 inches. \$5. (Fig. 17.)

Little Giant Duster, Improved. For distributing

Paris green, London purple, hellebore, sulphur, lime, etc. \$5.50 each.

Jardinieres, Oak. Handsome and durable. In these goods the oak is selected to show the quartered grain, stained dark and finished with luster surface. hoops and handles are of brass, highly polished and lacquered. Inside of tubs is

pai	inted a ricl	n, dark red.		Marilla Marilla and a second

The Essex Ball-Bearing Mower Four Blades Triple Gear 11-in. Wheel

An excellent ball-bearing mower. The 11-inch drive-wheels make it one of the easiest running mowers. The bottom, or cutting knife, being of the highest grade crucible steel, carefully hardened and tempered, and sharpened to a razor edge, supplies the other requisite to produce ease in operation. They cut within 134 inches of an obstruction. 16-inch, \$9.50; 18-inch, \$10.50; 20-inch, \$11.50; 22-inch, \$12.50.

Chain Roller Mower. Spec'ally designed for borders and golf greens. Runs easily and will cut close enough to satisfy the most fastidious golfer. 14-inch, \$12; 16-inch, \$13.

Victory Lawn Mower. A very satisfactory mower. Ten-inch wheels; four blades, and ball bearing. 14-inch, \$8.50; 16-inch, \$9.50; 18-inch, \$10.50; 20-inch, \$11.50; 22-inch, \$12.50.

Philadelphia Lawn Mower, Style K. Five blades, ten-inch wheel. Geared on both ends. 14-inch, \$7; 16-inch, \$7.75; 18-inch, \$8.50; 20inch \$9.25.

Philadelphia Lawn Mower, Style C. Four blades, 81/2-inch wheel.

Geared on both ends, 14-inch, \$6; 16-inch, \$6.75; 18-inch, \$7.50; 20-inch, \$8.25. Grass Catchers. No. 1. Will fit 14-, 16- and 18-inch mowers. \$1.25 each. No. 2. Will fit 18-, 20- and 22-inch mowers. \$1.50 each.

ESSEX BALL-BEARING MOWER

Townsend Triple Ratchet Horse Lawn Mower

Its Special Features Triple rolls (15 inches in diameter) with triple pawls in each roll, making the most powerful and instantaneous driving mechanism ever put in a lawn mower. This feature maintains the motion of the blades even in turning sharp corners, and forms a strong contrast with other double roll mowers whose knives have no motion when turning corners.

A lever beside the driver enables him to cut any height from the ground, and to easily and quickly raise the blades over stones or other obstructions without stopping the horse or leaving his seat.

A slight movement of a small lever near the driver throws the mower in or out of gear without stopping the horse. A very spacious foot-rest prevents cramping of limbs, and accident through the feet slipping into the revolving cutters. It is made very strong and of the best materials, and finished in the most perfect manner. It will cut over rough and uneven ground, and stand rough usage. We consider

it superior to any other mower ever built, and will refund the money to any customer dissatisfied after a trial. Furnished with seat, handles and shafts complete. 30-inch cut, \$60; 38-inch cut, \$70. CHAIN ROLLER MOWER

LAWN MOWERS, continued

Lawn Mowers, Granite State, Style C. High Wheel. The acme of perfection in lawn-mower construction! This machine has been produced in answer to the urgent demand for the "Granite State" built higher, larger and more powerful than the low-wheel mower. Its high wheels (10-inch) and extra large cylinder enable it to work easily and effectively in grass 8 or 10 inches high, while its five tempered steel knives working against an improved crucible steel bed-knife give a fineness of cut equaled only by regular golf mowers. 14-inch, \$7; 16-inch, \$8;

18-inch, \$9; 20-inch, \$10.

The Queen Ball - Bearing. This machine has proved very popular and a rapid seller. Made of highest grade materials, well finished and attractively painted, it is an ideal mower for those who desire a high-wheel, ball-bearing machine at a low cost. 14-inch, \$5.50; 16-inch, \$6; 18-inch, \$6.50; 20-inch, \$7.

The S. & F. This machine has for years

been a popular one, and is acknowledged

TOWNSEND TRIPLE RATCHET HORSE LAWN MOWER

as superior to many so-called first-class mowers. They are guaranteed to do good service. We furnish this machine regularly with four blades. 14-inch,

\$3.50; 16-inch, \$3.75.

Lawn Mowers, Repairing. We employ only practical men to attend to this work, those who thoroughly understand their business, and we guarantee all machines repaired by us to do satisfactory work.

Lawn Shoes, or Sandals, Baker's. Consist of a steel plate turned up at the toe to protect the turf, with two securely riv-

eted prongs
that go in
front of the
horse's shoe
and a clamp
of Norway
iron that
sets up firmly to the
heel. In ordering, send
s i z e of
horse's shoe
from heel

BAKER'S LAWN SHOE

(See illustration.)

Links Lawn Boots. The toe is rolling, the bottoms waterproofed, hardened and steel riveted inside and out.

Quickly and easily adjusted. No. 2, inside width, 5½
inch; No. 4, 6½ inch; No. 6, 7 inch. \$10 either size, per
set of four.

Mats, Hotbed, Straw. Made by hand from the best rye straw, and in the most thorough manner. Size, 6x 6 ft. \$1.50 each. Special prices on large lots, and special sizes made to order.

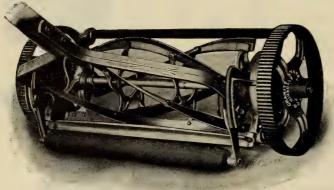

Mats, Hotbed, Palmer. 76 x 76 inches. No. 1. Made of burlap, wool-filled and quilted. \$1.35 each. No. 2. Made with burlap on one side and duck on the other, wool-filled and quilted same as No. 1. \$1.60 each.

Mats, Archangel. Useful in protecting from light frosts, etc. 80 cts. each.

Mats, Singapore Fiber. These are heavier than straw mats, but are said to be more durable. \$2 each.

Oil, Lubricating. For lawn mowers, etc. In oilers, ready for use. 20 cts. each.

Orchid Baskets. Square, made of the best seasoned cherry. 6-inch, \$3.50 per doz.; 8-inch, \$4 per doz.; 10-inch, \$4.75 per doz.; 12-inch, \$5.50 per doz.

Plant Protecting Cloth for Hotbeds. Valuable for covering hotbeds and frames in spring instead of glass, and for throwing over bedding plants at night in fall; for chrysanthemum houses, etc. Me-

dium grade, 10 cts. per yd.; by the piece, about 60 yds., 9 cts. per yd.

AUTO SPRAY PUMP

Pump, Auto Spray. Convenient, durable and efficient. Useful with Bordeaux and all solutions, also in applying cold water paints or whitewash. No continuous pumping, as in the case of the Knapsack Sprayer. A few strokes of plunger compresses enough air to cover a quarter acre of potatoes or similar crop. The operator simply holds the nozzle. A practical machine for potatoes, small fruits, poultry houses, greenhouses, etc. Diameter, 7 inches; height, 2 feet; capacity, 4 gallons; weight empty, 7 lbs., loaded, 39 lbs. No. 1, Pump, Auto Spray, continued

brass tank, \$6. No. 1, galvanized tank, \$4.50. With "Auto-Pop," or automatic valve, \$1 additional. Extension pipe, brass, 2 ft. length, 35 cts. each; elbow, extension brass, 35 cts. each. Torch, \$1.

Putty Bulb, Rubber. For glazing greenhouse sash. \$1 each; by mail, \$1.10.

Pruner, Waters' Tree. With 6-ft. pole,

85 cts.; 8-ft. pole, \$1; 10-ft. pole, \$1.15; 12-ft. pole, \$1.25; 14-ft. pole, \$1.35; 16-ft. pole, \$1.45; extra blades, 20 cts. each, \$2 per doz.

Pruner, Telephone, Tree. Can be used on a pole of any length and operated with a cord. Sold without handles. \$1 each; extra blades, 30 cts.; springs, 25 cts.

Pump, "Success" Garden and Spray.

An excellent pump for use in gardens, greenhouses, etc. It is furnished with Bordeaux nozzle, which throws a solid stream, fine or double spray, adjustable. \$4 each.

Pump, Johnson's Champion Force. It is made in a very durable manner, and cannot easily get out of order. The pump

has a sprinkler, straight-stream nozzle and rubber hose

attached. \$4.50 each.

Pump, Myers' Spray. Made of brass. Will throw a fine mist or coarse, as desired. For spraying trees, an 8-foot extension is furnished for 60 cts. extra. \$5.

Pump, Kinney's Atomizer. For use in greenhouses to distribute liquid fertilizer or to mix or temper hot and cold water under water pressure. \$1 50 each.

Putty, Twemlow's Old English Glazing. Semi-liquid and elastic. A superior article for bedding glass in sash or for filling cracks or seams in roof joints or frames. It is used in machine or bulb. 1, 2 and 3 gallons, \$1.25 per gal.; 5and10gals., \$1.20per gal.; bbl., 50gal., \$1.10per gal.

Raffia. The best material for tying, being very soft, plia-

ble and strong. 20 cts. per lb.

Rifle, Scythe. Best quality. 10 cts.

Rakes, Steel Garden, Long Teeth. 10 teeth, 40 cts. each; 12 teeth, 45 cts.; 14 teeth, 50 cts.; 16 teeth, 55 cts.; 18 teeth, 60 cts.

Rakes, Steel Garden, Short Teeth. 10 teeth, 45 cts. each; 12 teeth, 50 cts.; 14 teeth, 55 cts.; 16 teeth, 60 cts.; 18 teeth, 65 cts.

Rakes, Lawn, Wood, Close Teeth. 50 cts. each. Gibbs' No. 24, wire, 50 cts. each.
Rakes, Hay, Wood. Three bow. Best. 45 cts. each.

Rakes, English Daisy. For lawns. \$3 to \$3.50 each. Saws. Pruning. Superior quality. Single edge, 18-inch.

75 cts. each; 20-inch, 87 cts.; 22 inch, \$1. Double edge, 18-inch, \$1 each; 20-inch, \$1.25; 22-inch, \$1.25. (Fig. 19.) Saws. Pole. pruning. \$185 each.
Sash for Hotbeds. These are well made from thor-

oughly seasoned number, and glazed with double thick glass. Frame, $1\frac{1}{2}$ in., 3×6 ft., \$2.80 each; $1\frac{3}{4}$ in., 3×6 ft., \$3.

Scythes, English Lawn. Broad blade. \$1.40 each. Scythes, American. 32- to 38-inch, 85 cts. each. Scythes, Snaths. Patent swing socket. 80 cts. each.

Seed Drill, Eureka. \$1 each. Silkalene, or Smilax Thread. Spools, 25 cts. each. Stones, Scythe. Cyclone, New Red Stone, and Gem. 10 cts. each, Talacre. 25 cts. each.

Scissors, Flower. For cutting and holding flowers, 6-in., \$1 each; 7-in., \$1.50 (Fig. 23.)

Scissors, Grape, or Vine. For thinning the bunch. Nickle-plated, 6-in., 85 ets., 7-in., \$1. (Fig. 24.)

Scissors, Pruning, or Rose Pruners. Nickle-plated, 4-in., 75 cts. each; 5-in., \$1; 6-in., \$1.25. (Fig. 25.)

Sieves, Wire. For sifting loam, gravel, etc. Any size mesh, \$1 each.

Best English. 51/2-in., \$1.25; 8-in., Shears, Grass. \$1.50; 9-in., \$1.75; 10-in., \$2. (Fig. 26.)

Feet

Shears, Grass Border. Long handle, 9-in. blade, \$2.75 each; 10-in., \$3. (Fig. 27.) Long handle, wheel, 9-in. blade, \$3.25; 10-in., \$3.50.

Shears, Lawn. With long handle. For cutting grass under shrubs, etc. With wheels, 9-in., \$3.75; 10-in., \$4. Without wheels, 8-in., \$2.75; 9-in., \$3; 10-in., \$3.25.

Shears, Grass or Sheep. 35 cts. each. (Fig. 31.) True Vermonter. 75 cts.

Shears, Hedge or Grass. English, pruning notch, 8-in.

blade, \$1.50 each; 9-in., \$1.75; 10-in., \$2. Shears, French Pruning. With wheel spring. The best pruner ever offered, polished. 8-in., \$1.50 each, 9in., \$2; 10-in., \$2.25. (Fig. 28.)

Shears, S. & F. Co.'s Pruning. 8-in., \$1.25; 9-in., \$1.50; 10-in., \$1.75.

Shears, Branch, or Lopping. With long handles. No. 1, \$3; No. 2, \$3.50.

Shears, Pruning, Taylor No. 7. A good low-priced pruner. 50c. each. Shears, Ladies' Pruning. No. 17,

fine nickel-plated, 6-in. \$1. TENNENT'S SPRAYER Shears, Levin Pruning. 50 cts. and 75 cts. each. Sprayer, Tennent's. These machines have

glass receptacles, therefore will not rust or corrode. Small size for house use, 50 cts. Large size, holds about one quart, 75 cts.

Sprayer, Blizzard, High Pressure. After filling three-fourths full and pumping ten strokes of air, a continuous mist-like spray is thrown, which will last many minutes. No. 35, with galvanized iron tank, \$2.

Sprayer, Light. ning Insect. No. 20. A sprayer having a glass reservoir. Does not rust. 75 cts. Spraying Outfit, Barrel, Cart and Pump.

BLIZZARD SPRAYER Complete, including cart, barrel and double-acting perfect barrel spray pump, with 1-inch suction pipe, strainer, two pieces 1/2inch discharge hose, each 5 ft. long, two graduated Vermorel nozzles and jet agitator. \$22.50.

Shovels, Ames' Best. D. H. Square or round point. No. 2, \$1.25 each; No. 3, \$1.30 each.

Shovels, Merchants'. D. H. Square or round point. No. 2, 95 cts. each; No. 3, \$1 each.

Spades, Merchants'. No. 2,90 cts. each; No. 3, \$1 each. Spades, Ames' Best. No. 2, \$1.25 each; No. 3, \$1.30

Stakes, Cane. 7 to 9 feet. \$1.25 per 100. In bundles of 500, \$5 per bundle.

Stakes, Bamboo. 6 to 8 ft. \$5 per 100.

Stakes, Cane. Japanese bamboo. Small, 5 to 6 ft. 20 cts. per doz., \$1 per 100.

Stakes, Wire Rose. 3 ft., \$1.25 per 100; 4 ft., \$1.50 per 100; 5 ft., \$1.75 per 100; 6 ft., \$2 per 100.

Stakes, Garden, painted green. For house, greenhouse conservatory, and light garden work where plants require support.

Watering Pots. With long spouts, tin. 2-qt., 50 cts. each; 3-qt., 60 cts.; 4-qt., 65 cts.

Watering Pots, French. Made of galvanized iron; oval in shape, with brass handle and long spout; one fine and one coarse copper-faced rose with each. 6-qt., \$2.25; 8-qt., \$2.50; 10-qt., \$2.75.

Watering Pots, Manure. With extra large spouts, to allow a free flow of the thick liquid. \$2.75 each. Weeding Fork. Small, 35 cts.; large, 50 cts.

LEHMAN'S CARRIAGE HEATER

Lehman's Carriage Heaters and Coal

This heater, with the exception of No. 10, is a metallic case $7\frac{1}{2}$ inches wide, $3\frac{1}{2}$ inches deep, and of two lengths, 14 and 20 inches respectively. The top is oval, affording a comfortable resting place for the feet. It will make a vehicle absolutely comfortable in the coldest weather, and will give a continuous heat for fifteen hours; it is operated at a cost of one-half cent per hour. Danger from fire is impossible, and it is absolutely unbreakable, being constructed without solder or casting, and it can be heated and ready for use within a few minutes. No. 10 is made of the same material, but its width is 16 inches, depth 10 inches and length 14 inches, and is especially adapted for heavy vans and large delivery wagons.

No. 5. 14 in. long, polished plated metal ends, not covered. \$2.50.

No. 5B. 14 in. long, polished plated metal ends, covered with Brussels carpet. \$3.

No. 3. 14 in. long, polished brass ends, not covered. \$3.75.

No. 3B. 14 in. long, polished brass ends, covered with

Brussels carpet. \$4.25. No. 10. 14 in. long, 16 in. wide and 10 in. high, containing 3 drawers. \$7.25.

The Queen Carriage Heater. New. 14 in, long, in two styles. Especially adapted to single-seated vehicles, as its shape renders it a convenient foot-rest. The unique feature of this heater is the damper at each end, which is for regulating the heat at will or entirely extinguishing the burning coal.

Queen No. 1. White metal ends, not covered. \$2.50.

Queen No. 1c. White metal ends, covered with carriage carpet. \$3.

Queen No. 2. Polished brass ends, not covered. \$2.75. Queen No. 2c. Polished brass ends, covered with carriage carpet. \$3.25.

Coal. In boxes of one dozen full-sized bricks. 75 cts.: in cases of 100 full-sized bricks, \$6.

INSECT EXTERMINATORS

Ant Exterminator. Q. R. S. For the destruction of ants in lawns and pleasure grounds. In three sizes. 25

cts., 50 cts. and 75 cts. each, postpaid.

Arsenate of Lead. The latest and best known insecticide for all leaf-eating insects. It adheres to the foliage for weeks, thus making frequent spraying unnecessary. Lb. cans, 25 cts.; 5 lbs., 90 cts.; 10 lbs., \$1.70; 20 lbs., \$3.40; 50 lbs., \$8; 100 lbs., \$15.

Aphis Punk, Nikoteen. Destroys greenfly, thrip, etc.,

in greenhouses. Pkg. 60 cts.; case, \$6.50.

Bug Death. A non-poisonous powder. It is sure death to all plant-eating pests. 1-lb. pkg., 15 cts.; 3-lb. pkg., 35 cts.; 5-lb. pkg., 50 cts.; 12½-lb. pkg., \$1.

Cattle Comfort. Protects cattle and horses from flies.

A sure and harmless preventive, easily applied with a

sprayer. Qt., 50 cts.; gal., \$1.25.
Flour of Tobacco and Sulphur. Will prevent and cure mildew on grape-vines and rose bushes. Lb., 10 cts.;

5-lb. pkg., 40 cts.; 10-lb. pkg., 75 cts.

Fir-Tree Oil. For destroying all insects and parasites that infest fruit trees, plants and animals. Small bottles, 25c.; ½pt., 50c.; pt., 75c.; qt., \$1.25; 2 qts., \$2.25. Gipsy Moth Creosote. For the destruction of the eggs

of gipsy moth. Qt., 20 cts.; gal., 50 cts.; in barrels at 40 cts. per gallon.

Gishurst Compound. Box, 60 cts.

Hellebore, White Powdered. For the destruction of rose slugs and current worms. Very effectual. 1/2-lb.

pkg., 15 cts.; 1-lb pkg., 30 cts.
"Imp" Soap Spray. The base is a pure soap. It contains vegetable poisons, harmless to plants, but peculiarly effective against red spider on fruits, etc., the rhododendron fly, rose bug and other insect pests on fruits, flowers and foliage. It sticks, but can be easily washed off before marketing. One gallon (can) makes 12 gallons of spraying fluid. Qt., 50 cts.; gal., \$1.50; 5 gals., \$6; 10 gals., \$10.
"Imp" Worm and Ant Destroyer. A poisonous

liquid, absolutely harmless to grass. One gallon makes 120 gallons of spraying liquid. Upon spraying the ground, worms and ants immediately rise to the surface. They are raked off and burned. Astonishingly effective on golf-greens, lawns and flower-borders. Qt., 75 cts.; gal.,

\$2; 10 gals., \$20.

Kerosene Emulsion, Concentrated, Lion Brand. Especially valuable for the destruction of the green and black fly, scale, woolly aphis and all sucking insects. Qt.,

40 cts.; gal., \$1; 5 gals., \$4.50.

Lemon Oil. A cheap, safe and effectual insecticide. Dilute with water 30 to 50 parts. ½pt., 25 cts.; pt., 40 cts.; qt., 75 cts.; 2 qts., \$1.25; gal., \$2.

London Purple. Lb. 20 cts.

Nicoticide Fumigating Compound. For killing all kinds of insects on plants in greenhouses and frames. Sold in cans as follows: Gal., \$18; No. 1, one pint, sufficient for 32,000 cubic feet of space, \$2.50; No. 2, 1/2 pt., \$1.25; No. 3, 4 oz., 70 ets. Fumigators, 50 ets. each, con-

sisting of three parts,—the pan, wire frame and lamp.

"Nico-Fume" Tobacco Paper. (Registered.) For fumigating greenhouses. "Nico-Fume" is positively the strongest Tobacco Paper on the market. Packed in special friction-top tins, and is sold as follows: 24 sheets, 75 cts.; 144 sheets, \$3.50; 288 sheets, \$6.50.

Nikoteen. A liquid to be used in spraying or vaporizing. Pt. bottles, \$1.50 each; 5 for \$7.

Nico-Fume Liquid. A nicotine solution of exceptional purity. Does not stain nor injure blooms nor leave a disagreeable odor. ¼pt., 50 cts.; pt., \$1.50; ½gal., \$5.50; gal., \$10.50.

Persian Insect Powder. ½lb., 25 ets.; lb., 50 ets.

Paris Green. Strictly pure. Lb., 30 cts. Richard's X L All, Vaporizing Compound. A safe, cheap, effectual material for the destruction of insects in greenhouses. Costs 25 cents per 1,000 cubic feet. Bottle, sufficient for 20,000 cubic feet, \$4.50; sufficient for 40,000 cubic feet, \$8. Vaporizing fumigator for same (Richard's), \$1.10.

Richard's X L, All, Liquid Insecticide. Destroys mealy bug, red spider, etc. Pt., 65c.; qt., \$1; ½gal., \$1.75. Scalecide. The best spray for San José scale and all soft-

bodied insects. Qt., 40c.; gal., \$1; 5 gal., \$4; 10 gal., \$7. Slug Shot, Hammond's. Destroys insects injurious to house and garden plants, vegetables and fruit of all kinds. Directions for use on each package. 1-lb. cartons, each, 12c.; 5-lb. pkg., 25c.; 10-lb. pkg., 50c.; 100-lb. pkg., \$4.50.

Soap, Sulpho-Tobacco. 3-oz. pkg., 10 ets.; mailed post-paid, 13 ets.; per doz., \$1; 3/2-lb. pkg., 20 ets.; mailed

postpaid, 28 cts.; per doz., \$2.

Soap, Whale Oil. Excellent for destroying insects on plants, trees, vines, etc. Lb. pkg., 15 cts.; 2-lb., 25 cts.;

5-lb., 50 cts.; 10-lb., 90 cts.; 100-lb., \$8.50. **Tobacco Dust.** Lb., 10 cts.; 5 lbs., 20c.; 100 lbs., \$2.50. **Tobacco Extract, "Rose Leaf."** A concentrated ex-

tract, for use in greenhouses. Can be used by vaporizing or applying on the pipes with a brush. Diluted with water it can also be applied with a syringe. Qt., 50 cts.; gal., \$1.50; 5 gals., \$5.

Tobacco Stems. For fumigating. Valuable also when used as a mulch for rose beds. Small quantities, per lb., 5c.; in bbls., per lb., 3c.; large bales or cases, per lb., 2c.

Tree Tanglefoot. A safeguard for trees, shrubs, etc., against the gipsy moth and canker worm. It should be applied before the foliage appears; a continuous band 2 inches in width and one-sixteenth to 1/8 inch in thickness being put around the trunk of the trees 3 or 4 feet from the ground. It is perfectly harmless to the trunk and remains sticky during hot, cold and wet weather. Lb, 25 cts., in 1-, 4-, 10- and 25-lb. pkgs.

STERLINGWORTH

WEED & KILLER

Weed Killer, Sterlingworth. A most satisfactory and powerful weed-killer, compounded especially for use on walks, drives, tennis courts, etc. It is a powder to be dissolved in water. It completely destroys all kinds of grass, briers, thistles, poison ivy, etc., when applied. One gallon covers three to

Remedies for Fungus, Mildew, Etc.

Ammoniated Solution of Copper. A liquid fungicide, ready for use. Dilute at the rate of 1 quart to 25 gallons of water, and spray lightly. Qt., \$1; gal., \$2; kegs and barrels, \$1.75 and \$1.50 per gal.

Bordeaux Mixture. Lion Brand. One gallon will make 50 gallons by the addition of 49 gallons of water. One

gal, patent cans, \$1; 1 qt. patent cans, 40 cts.

INSECT EXTERMINATORS, continued

Flowers of Sulphur. Prevents mildew on grape-vines. bushes, etc. Lb., 8 cts.; 5 lbs., 25 cts.

Grape Dust. For destroying mildew on grape-vines and trees affected with mould, mildew or rust-mites. 5 lb. pkg., 35 cts.

Bordeaux Mixture with Paris Green. Lion Brand. A combination which, in addition to preventing blight, mildew, etc., will kill potato bugs and all leaf-eating insects. Qt., 50 cts.; gal., \$1.25.

FERTILIZERS

Pure Sheep Manure. We offer an exceptionally pure lot of this excellent fertilizer. It is a pure, natural manure and the most nutritious food for plants. Its effect is immediate, much more lasting and healthful than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest and quickest liquid manure, rivaling guano, without any deleterious effects. For flower or vegetable without any detectrious effects. For hower or vegetable gardens, and as top-dressing for lawns, it is unequaled. Price, 6-qt. pkg., 25 cts.; 25-lb. bag, 75 cts.; 50-lb. bag, \$1.25; 100-lb. bag, \$2; ton, \$35.

Imperial Plant - Food Chemicals. Rich in phos-

phates, nitrogen and potash, the well-known essentials of plant life, combined in the best proportions ascertained from years of careful experimenting. They are entirely free from objectionable odor, and are particularly valuable for flower fanciers and horticulturists, for use in potted and garden soils, lawns and grass-plots. We offer

the "Chemicals" in dry form as follows :-

plant-food as any other commercial fertilizer.

A similar mixture designed for lawn and golf greens, and used by all the best golf clubs, is sold in the same sized packages, and at prices as above.

Clay's Fertilizer. A safe and reliable preparation. In great favor with successful gardeners in England. Prices: ½-cwt. (14 lbs.), \$1.25; ½-cwt. (28 lbs.), \$2.25;

½-cwt. (56 lbs.), \$4; 1-cwt. (112 lbs.), \$7.

Thomson's Vine, Plant and Vegetable Manure. A safe and reliable food and stimulant for every fruitbearing plant, also for foliage and flowering plants and vegetables of all descriptions. Prices: ½-cwt. (14 lbs.), \$1.25: ¼-cwt. (28 lbs.), \$2.25; ½-cwt. (56 lbs.), \$4; 1-cwt.

(112 lbs.), \$7.

Thomson's Special Chrysanthemum Manure. Entirely soluble and very powerful, especially suitable for top-dressing chrysanthemums and similar plants. It is meant to be used as an additional stimulant during the growing season. A heaped dessert-spoon full will be sufficient for a 10-inch pot, sprinkled over the surface of the soil, and watered in with tepid water. This may be given three times during the growing season. Price, lb., 25 cts.; 7 lbs., \$1.25; 14 lbs., \$2.25; 28 lbs., \$4; 56 lbs., \$7.

Phosphate of Potash "Imp." Granulated crystals, water-soluble. A pure crystallized chemical, containing no nitrogen. Entirely soluble in cold water. Extremely rich in phosphoric acid and potash; therefore best used to force bloom and fruit, in conjunction with natural manures, which mainly supply the nitrogen for foliage grewth. Analysis: Available phosphoric acid, 50 per cent; available soluble potash, 33 per cent. Price, 10 lbs., \$3; 25 lbs., \$6; 50 lbs., \$11; 100 lbs., \$21; over 100 lbs., \$20 per 100 lbs.

Phosphate of Ammonia "Imp." Granulated crystals, water-soluble. A pure, crystallized chemical, entirely soluble in cold water. The only fertilizing chemical known that contains phosphoric acid in water-soluble form combined with ammonia only. Analysis: Nitrogen,

PRICES SUBJECT TO CHANGE.

Phosphate of Ammonia "Imp.," continued 11.9, per cent; = ammonia, 15 per cent; available phosphoric acid, 60.5 per cent. Price, 10 lbs., \$2.50; 25 lbs., \$5.50

Swift's Lowell Animal Fertilizer. A Complete Manure for all Crops. This brand is an unsurpassed all-round fertilizer, and we confidently recommend it as an unequaled crop-producer for general crops. 50-lb. bag, \$1, 100-lb. bag, \$1.75; ton, \$32.

Lawn and Garden Dressing, S. & F. Co.'s. An odor-

less fertilizer, especially prepared for us, entirely from chemicals, and designed for top-dressing lawns. It is quick and lasting in its effects, and produces a thick, velvety sward. Trial bags for 1,000 sq. ft., 50 cts.; trial bags for 2,500 sq. ft., \$1; 50-lb. bags for 5,000 sq. ft., \$1.75; 100-lb. bags for \(\frac{1}{4} \) acre. \(\frac{9}{2}.75; \) ton, \(\frac{5}{0}. \)

Hill and Drill Phosphate, Bowker's. A general fertilizer. Price, 50-lb. bag, \$1; 100-lb. bag, \$1.80.

Bone, Fine Ground. Made from the very best cattle

bones, carefully selected, and ground to a condition of uniform fineness. Price, 5 lbs., 25 cts.; 10 lbs., 40c.; 25 lbs., 75c.; 100-lb. bags, \$1.75; ton, \$30.

Bone, Pure Flour of. Ground very fine. An excellent

fertilizer for pot-plants or beds where an immediate effect is desired. Excellent for roses.

effect is desired. Excellent for roses. Price, 5 lbs., 25 cts.; 50 lbs., \$1.25; 100 lbs., \$2; ton, \$35. Bone, Inch or Crushed. Very valuable for preparing soil for grape-vines, etc. 100-lb. bags, \$2.25; ton, \$34. Ammoniated Food for Flowers, Bowker's. No. 1, 15 cts.; No. 2, 25 cts. If by mail, 25 cts. for No. 1, and

45 cts. for No 2.

Dried Blood. 12 to 14 per cent ammonia. Per 100 lbs., \$2.50; per ton, \$45.

Nitro-Culture. See page 73.

Acid Phosphate. 14 to 16 per cent soluble and available phosphoric acid. 100 lbs., \$1.25; ton, \$20.

Charcoal, crushed or broken. Bus., 60 cts.; bbl., \$1.25. Cotton Seed Meal. 100 lbs., \$2; ton, \$34.

Stockbridge Special Manure. For potatoes, corn and grain, small fruits, vegetables, root crops, asparagus, top-dressing grass and seeding down grass. Price, 100lb. bags, \$2; ton, \$38.

Bone Black, Dissolved. Containing 16 to 18 per cent soluble and available phosphoric acid. Price, 100 lbs., \$1.50; ton, \$25.

Double Sulphate of Potash and Magnesia. 48 to 52 per cent sulphate of potash, 35 to 40 per cent sulphate of magnesia. Price, 10 lbs., 40 cts.; 100 lbs., \$2; ton, \$35.

Kainit. 23 to 25 per cent sulphate and muriate of potash; 12 to 13 per cent actual potash. 100 lbs., \$1.25; ton, \$15.

Muriate of Potash. 80 to 85 per cent. Price, 10 lbs., 50 ets.; 100 lbs., \$2.75; ton, \$45.

Nitrate of Soda. 95 to 98 per cent purity. Price, 10 lbs., 50 cts.; 100 lbs., \$3.50; ton, \$60.

Sulphate of Ammonia. (Best.) White or Gray. 243/4 to 251/4 per cent ammonia. Price, 10 lbs., 60 cts.; 100 lbs., \$4; ton, \$75.

Salt. Used as a top-dressing for lawns and asparagus beds. Price, 100 lbs., 75 cts.; ton, \$10.

Soot, Imported Scotch. 100 lbs., \$2.50.

Unleached Hardwood Ashes. One of the best fertilizers for lawns; also excellent for all kinds of garden or farm crops. 100-lb. bag, \$1.25; ton in bags, \$16; bbl. (200 lbs.), \$2; ton in bbls., \$18. In carload lots (in bulk), prices on application.

Land Plaster, or Ground Gypsum. Valuable as an absorbent, disinfectant and insecticide. 5 lbs., 15 cts.;

25 lbs., 50 cts.; barrel, \$1.75; ton, \$9.

Peat, Leaf-Mold, Etc.

Rotted Fibrous Peat. Very fine and light. For use in potting plants this is invaluable. Price, ½ pk., 20 cts.; pk., 30 cts.; bu., \$1; bbl., \$2.

Silver Sand. For mixing with potting soil and for propa-

gating. Pk., 50 cts.; bu., \$1.50.

Leaf-Mold. Exceedingly useful for potting material.
Price, ½ pk., 20c.; pk., 30c.; bu., \$1; bbl., \$2.

Prepared Potting Soil. Specially prepared with peat, leaf-mold, loam, sand, and a sufficient quantity of fertilizer. Price, ½ pk., 20 cts.; pk., 30 cts.; bu., \$1;

Moss, Sphagnum. For florists' use. Best quality. Price, bbl., \$1.50; bu., 75 cts.

Orchid Peat, or Fern Root. Bbl., \$2.75; bu., \$1.50.
